LIST OF CONTENTS	v
LIST OF TABLES	xi
LIST OF FIGURES	xiv
CHAPTER 1 - INTRODUCTION AND REVIEW OF LITERATURE	
1.1 Indigenous systems of medicine	1
1.2 Medicinal Plants	2
1.3 Ayurveda and kidney disease	6
1.4 Renal Physiology	7
1.5 Diuretics	10
1.5.1 Principal sites of action of clinically useful diuretics	11
1.5.2 Classification of diuretics	12
1.5.3 Medical Indications of Diuretics	16
1.5.4 Adverse effects of diuretics in general	17
1.6 Plants with Diuretic Activity	20
1.7 Medicinal plants used in Sri Lanka for diuretic activity	22
1.8 Objective of the present study	36
1.9 Plant used in the present study	37
1.10 Previous studies on the diuretic activity of these plants	38

Page No.

1.11	Botanical Features and Medicinal uses of plants used in this study	38
1.11.1	<i>Allium sativum</i>	38
1.11.2	<i>Aloe vera</i>	39
1.11.3	<i>Alternanthera sessilis</i>	39
1.11.4	<i>Asparagus racemosus</i>	40
1.11.5	<i>Hygrophila longifolia</i>	40
1.11.6	<i>Basella alba</i>	41
1.11.7	<i>Benincasa hispida</i>	41
1.11.8	<i>Bryophyllum serratum</i>	42
1.11.9	<i>Paederia foetida</i>	43
1.11.10	<i>Phaseolus aureus</i>	43

CHAPTER 2 - MATERIALS AND METHODS

2.1	General	44
2.2	Experimental animals	44
2.3	Healthy human volunteers	44
2.4	Collection and identification of plants	45
2.5	Preparation of drugs	45
2.6	Dosage and administration of drugs	47
2.7	Sampling of blood	47
2.8	Diuretic activity	48
2.9	Estimation of urinary electrolytes	48
2.10	Estimation of urinary and serum osmolality	51

	<i>Page No.</i>
2.11 Osmolar clearance and Free water clearance	51
2.12 Determination of serum creatinine	52
2.13 Determination of creatinine in Urine	53
2.14 Endogenous creatinine clearance Test	54
2.15 Effect of the extract of <i>Asparagus racemosus</i> on key hepatic enzyme levels	54
2.16 Effect of the extract of <i>A.racemosus</i> on Red blood cell count, White blood cell count and Haemoglobin concentration	61
2.16.1 Determination of Red blood cell count	61
2.16.2 Determination of White blood cell count	62
2.16.3 Determination of Haemoglobin concentration in blood	64
2.17 Histopathological study of the effects of long term treatment of rats with <i>A.racemosus</i>	64
2.18 Effect of the extract of <i>A.racemosus</i> on ovulatory activity	66
2.19 Evaluation of possible teratogenic potential of <i>A.racemosus</i> extract	66
2.20 Isolation of active component responsible for diuresis form <i>A.racemosus</i>	67
2.20.1 Screening for alkaloids	69
2.20.2 Screening for quaternary alkaloids	70
2.20.3 Screening for glycosides	70
2.20.4 Screening for Phenolic compounds	72
2.20.5 Screening for Flavonoids	72
2.20.6 Screening for steroids and triterpenoids	73
2.21 Statistical analysis	73

CHAPTER 3 - RESULTS; ANIMAL STUDIES

3.1	Introduction	74
3.2	Experimental	75
3.2.1	Experimental animals	75
3.2.2	Dosage and administration of drugs	75
3.2.3	Effect of the extracts of these medicinal plants on urine output and electrolyte excretion and comparison with that of frusemide	75
3.2.4	Dose response studies	76
3.2.4.1	<i>Asparagus racemosus</i>	76
3.2.4.2	<i>Hygrophilla longifolia</i>	76
3.2.4.3	<i>Alternanthera sessilis</i>	76
3.2.5	Effect of aqueous extracts of some medicinal plants on osmolar clearance and free water clearance and comparison with that of distilled water	77
3.2.6	Effect of storage of the extract of <i>A.racemosus</i> on diuretic activity	77
3.3	Results	78
3.3.1	Effect of the extracts of some medicinal plants on urine output	78
3.3.2	Effect of dosage of <i>A.racemosus</i> on urine output and electrolyte excretion	81
3.3.3	Effect of dosage of <i>H.longifolia</i> and <i>A.sessilis</i> on urine output and electrolyte excretion	81
3.3.4	Effect of aqueous extract of <i>A.racemosus</i> on osmolar clearance and free water clearance	81
3.3.5	Effect of storage of extract of <i>A.racemosus</i> on urine output and electrolyte excretion	85
3.4	Conclusions	85

CHAPTER 4 - RESULTS; HUMAN STUDIES ON *Asparagus racemosus* EXTRACT

4.1	Introduction	87
4.2	Experimental	87
4.2.1	Preparation of plant extract for human experiments	87
4.2.2	Effect of <i>A.racemosus</i> on urine output and several other parameters in healthy human volunteers	87
4.3	Results	88
4.4	Conclusion	92

CHAPTER 5 - RESULTS; ISOLATION OF ACTIVE COMPONENTS FROM *Asparagus racemosus*

5.1	Introduction	93
5.2	Isolation of active components responsible for diuresis from <i>Asparagus racemosus</i>	93
5.2.1	Separation of active fractions	93
5.2.2	Biological testing	94
5.3	Results	94
5.4	Conclusion	101

CHAPTER 6 - RESULTS; STUDIES OF THE TOXICITY OF *Asparagus racemosus*

6.1	Introduction	102
6.2	Experimental	103
6.2.1	Effect of the extract of <i>A.racemosus</i> on liver function	103
6.2.2	Effect of the extract of <i>A.racemosus</i> on Red blood cell count, White blood cell count and Haemoglobin concentration	103

	<i>Page No.</i>
6.2.3 Histopathological study of the effects of long-term treatment of rats with <i>A.racemosus</i>	104
6.2.4 Effect of the extract of <i>A.racemosus</i> on ovulatory activity	104
6.2.5 Effect of the extract of <i>A.racemosus</i> on teratogenicity	105
6.3 Results	105
6.3.1 Effect of the aqueous extract of <i>A.racemosus</i> on liver function	105
6.3.2 Effect of the extract of <i>A.racemosus</i> on Red blood cell count, White blood cell count and Haemoglobin concentration	105
6.3.3 Effect of the aqueous extract of <i>A.racemosus</i> on ovulatory activity	107
6.3.4 Effect of the extract of <i>A.racemosus</i> on teratogenicity	107
6.3.5 Histopathological study of the effects of long-term treatment of rats with <i>A.racemosus</i>	109
6.4 Conclusion	119
DISCUSSION	120

LIST OF TABLES

		<i>Page No.</i>
Table 1.1	Plants with confirmed diuretic activity with the active fraction identified	21-22
Table 1.2	Medicinal plants used in Sri Lanka for diuretic activity	22-36
Table 2.1	Calibration graph for ALT	58
Table 2.2	Calibration graph for AST	58
Table 3.1	Plants used in the preliminary investigation	74
Table 3.2	Cumulative urinary volume excreted by rats treated with plant extracts popularly used as diuretics in Sri Lanka	79
Table 3.3	Urinary electrolyte excretion by rats treated with plant extracts popularly used as diuretics in Sri Lanka	80
Table 3.4	Comparison of urine output by rats treated with different doses of <i>A.racemosus</i>	82
Table 3.5	Urinary electrolyte excretion by rats treated with different doses of <i>A.racemosus</i>	82
Table 3.6	Comparison of urine output by rats treated with different doses of <i>H.longifolia</i> and <i>A.sessilis</i>	83
Table 3.7	Urinary electrolyte excretion by rats treated with different doses of <i>H.longifolia</i> and <i>A.sessilis</i>	84
Table 3.8	Comparison of osmolar clearance and free water clearance of rats treated with <i>A.racemosus</i> and distilled water	84
Table 3.9	Effect of storage of aqueous extract of <i>A.racemosus</i> on diuretic activity	85

Page No.

Table 4.1	Urine output by human volunteers treated with <i>A.racemosus</i> and with plain conjee	89
Table 4.2	Urine flow rate by human volunteers treated with <i>A.racemosus</i> and with plain conjee	89
Table 4.3	Electrolyte excretion by human volunteers treated with <i>A.racemosus</i> and with plain conjee	90
Table 4.4	Flow rate of urine, sodium ion and potassium ion by human volunteers treated with <i>A.racemosus</i> and with plain conjee	90
Table 4.5	Comparison of osmolar clearance and free water clearance of human volunteers treated with <i>A.racemosus</i> and with plain conjee	91
Table 4.6	Comparison of creatinine clearance of human volunteers treated with <i>A.racemosus</i> and with plain conjee	91
Table 4.7	The effect on urine pH by human volunteers treated with <i>A.racemosus</i> and with plain conjee	92
Table 5.1	Mean urinary output in rats treated with different fractions of <i>A.racemosus</i>	96
Table 5.2	Mean urinary electrolyte excretion in pooled urine sample of rats treated with different fractions of <i>A.racemosus</i>	97
Table 5.3	Osmolality of pooled urine samples of rats treated with different fractions of <i>A.racemosus</i>	98
Table 5.4	Osmolality of serum samples of rats treated with different fractions of <i>A.racemosus</i>	99
Table 5.5	Osmolar clearance and free water clearance of rats treated with different fractions of <i>A.racemosus</i>	100
Table 5.6	Results of chemical screening	101

Page No.

Table 6.1	Effect of the aqueous extract of <i>A.racemosus</i> on serum levels of ALT and AST	106
Table 6.2	Effect of the aqueous extract of <i>A.racemosus</i> on RBC count, WBC count and Haemoglobin concentration	106
Table 6.3	Effect of the aqueous extract of <i>A.racemosus</i> on ovulatory activity	108
Table 6.4	Reproductive indices for rats treated with aqueous extract of <i>A.racemosus</i>	108-109
