## Editorial Note

Thanks to all the authors, we have received a high number of abstracts in diverse disciplines under science and technology for RISTCON-2024. First, all of the initial submissions were screened for novelty and plagiarism. We then used a double-blind review, with each blind (extended) abstract sent to three experts in the relevant field. The final decision of the submitted abstract was made by the editorial board by considering the decisions and comments made by the reviewers. We believe that this unbiased review process has ensured a high quality and standard in the publication of proceedings.

However, the responsibility for the content in each publication remains with the respective authors. No part of this serial publication will be reproduced in any form. When citing the published abstracts, this serial publication can be referred to as ‘Proceedings of the 11<sup>th</sup> Ruhuna International Science and Technology Conference - 2024, Faculty of Science, University of Ruhuna, Matara, Sri Lanka’.
