TABLE OF CONTENTS

page

Chapter 1: Introduction 1

1.1 A Very Brief Survey of the Development of the Theory of Statistics 1

1.2 Statistical Tests 5

1.2.1 Advantages of Non-parametric Statistical Tests 14

1.2.2 Disadvantages of Non-parametric Tests 15

1.2.3 When to use Non-parametric Statistical Tests 15

1.3 Aims and Objectives 16

1.4 Organization of the Thesis 17

Chapter 2: A Review of Some Statistical Tests 18

2.1 Introduction 18

2.2 Some Important Non-parametric Statistical Tests 19

2.3 Review of Statistical Tests more relevant to the Developed Test 21

2.4 Review of Some Statistical Tests for Comparing k populations 23

Chapter 3: The Test Statistic 25
3.1 Introduction 25
3.2 Building of the Test Statistic 27

Chapter 4: Asymptotic Distributions 33
4.1 The Multiple Non-Central Hyper-Geometric Distribution 33
4.2 Asymptotic Normality of the Multiple Hyper-geometric Distribution 35
4.3 Asymptotic Distributions Under H_0 43
4.4 Asymptotic Distribution under the Alternatives 55

Chapter 5: Power Comparisons 70
5.1 Asymptotic Powers 70
5.2 Simulation Studies 73

Chapter 6: Conclusions and Discussion 86

Bibliography 89

Appendix 91
A.1 The Program Used to Generate Random Numbers 91
A.2 The Program Used to Calculate the Karl Pearson Chi Value of the Generated Data 93
A.3 The Program Used to Calculate the Non-Centrality Parameter λ which is used to Calculate the Asymptotic Powers 0f the Q_{ld} Test 95
A.4 The Program Used to Compare the Powers of the Q_{ld} Test, Karl Pearson's Test, Mantel Test 109
