Abstract

**CHAPTER 1 : GENERAL INTRODUCTION**

**CHAPTER 2 : LITERATURE REVIEW**

2.1. Present status of agriculture in Sri Lanka  
2.2. Importance of agroforestry as a land use system in Sri Lanka

   2.2.1 Agroforestry

   2.2.2. Major agroforestry species occurring in wet and dry zones of Sri Lanka

   2.2.3. Significance of agroforestry species

      2.2.3.1. Ecological/Environmental aspects

      2.2.3.2. Economical aspects

      2.2.3.3. Social aspects

   2.3. Nutrient cycling by agroforestry species

      2.3.1. Litter-fall

      2.3.2. Nutrient concentration of leaf-litter

      2.3.3. Rate and degree of decomposition of litter

   2.4. Factors affecting litter decomposition and nutrient release

      2.4.1. External factors

      2.4.2 Substrate quality

         2.4.2.1. Polyphenol content

         2.4.2.2. Nitrogen content and Carbon to Nitrogen ratio

         2.4.2.3. Lignin content

         2.4.2.4. Effect of mixing
2.5. Foliar nutrient resorption

2.5.1. Factors affecting nutrient resorption

2.5.2. Importance of nutrient resorption

2.6. Soil respirometry

2.7. Relevance of agroforestry species in developing sustainable agroecosystems

CHAPTER 3 : CHEMISTRY OF LEAF LITTER OF NINE TRADITIONAL AGROFORESTRY SPECIES

3.1. Introduction

3.2. Materials and Methods

3.3. Results

3.3.1. Concentrations of macro-nutrients (N, P, K, Ca and Mg)

3.3.2. Concentration of carbon, lignin, and cellulose in leaf litter

3.4. Discussion

CHAPTER 4 : DECOMPOSITION OF AND CO₂ EVOLUTION FROM LEAF LITTER OF NINE AGROFORESTRY SPECIES

4.1. Introduction

4.2. Materials and Methods

4.2.1 Site description

4.2.2. Litter decomposition

4.2.3. CO₂ evolution from the leaf litters

4.2.4. Computational procedures

4.2.5. Statistical analyses

4.3. Results

4.3.1. Time course of decomposition of litter types
4.3.2. Decomposition constant and half-life of litter types 59

4.3.3. Effects of litter quality on mass loss 60

4.3.4. Soil respirometry 62

4.4. Discussion 63

4.4.1. Decomposition of leaf litter 63

4.4.2. Decomposition constant and half-life of leaf litter 66

4.4.3. Effects of initial litter chemistry on decomposition rate 67

4.4.4. CO₂ evolution from leaf litter 68

CHAPTER 5 : NUTRIENT RELEASE PATTERN OF LEAF LITTER OF NINE AGROFORESTRY SPECIES 72

5.1. Introduction 72

5.2. Materials and Methods 74

5.2.1. Site description 74

5.2.2. Litter decomposition and nutrient dynamics 74

5.2.3 Computational procedure 75

5.2.4 Statistical analysis 75

5.3. Results 75

5.3.1. Nutrient release pattern 75

5.3.1.1. Nitrogen (N) 75

5.3.2.2. Phosphorus 79

5.3.2.3. Potassium 80

5.3.2.4. Calcium 82

5.3.2.5. Magnesium 83

5.3.2.6. Impact of litter quality on nutrient dynamics 85

5.3.2.7. Correlation between mass loss and nutrient dynamics 87
5.4. Discussion

5.4.1. Nitrogen

5.4.2. Phosphorus

5.4.3. Potassium

5.4.4. Calcium and magnesium

CHAPTER 6: NITROGEN RESORPTION EFFICIENCIES OF THE AGROFORESTRY SPECIES

6.1. Introduction

6.2. Materials and methods

6.2.1. Site description

6.2.2. Species studied

6.2.3. Sampling

6.2.4. Chemical analysis

6.2.5. Calculations

6.2.6. Statistical analyses

6.3. Results

6.3.1. Nitrogen concentrations in foliage

6.3.2. Nitrogen resorption efficiencies (NRE)

6.3.3. Relationship between N content and Nitrogen Resorption Efficiency (NRE)

6.4. Discussion

CHAPTER 7: GENERAL DISCUSSION AND CONCLUSIONS

CHAPTER 8: REFERENCES
## LIST OF TABLE

4.4. Correlation co-efficient of initial litter quality versus decomposition constant

4.5. Annual decomposition rate constant (k) and half-life (T\(^0\) \(_{50}\)) of tree species in the tropics

5.1. Percentage of N remaining in leaf litter of species during the experimental period

5.2. Percentage P remaining in leaf litter of agroforestry species during the experimental period

5.3. Percentage K remaining of leaf litter of different agroforestry species

5.4. Percentage Ca remaining of leaf litter of different agroforestry species

5.5. Percentage Mg remaining of leaf litter of different agroforestry species

5.6. Correlation co-efficient of initial litter quality versus nutrient release

5.7. Linear regression of nutrient content against mass loss for nine species

5.8. Percentage nutrient immobilization of some forest and agroforestry species

6.1. Nitrogen concentration (%) in leaves of nine agroforestry species.

6.2. Foliar nitrogen resorption efficiencies of nine major agroforestry species

6.3. Nitrogen retranslocation of some tree species
