Introduction	1
CHAPTER 1	
Introduction	4
1.0 Basic Concepts of Solid State Physics	4
1.1 Semiconductors	4
1.1.1 Intrinsic Semiconductors	4
1.1.2 Extrinsic Semiconductors	6
1.1.3 Oxide Semiconductors	8
1.1.4 Direct and Indirect Semiconductors	8
1.1.5 Degenerate and Non-degenerate Semiconductors	10
1.1.6 Organic Semiconductors	12
1.1.7 Amorphous Semiconductors	13
1.2 The properties of semiconductors	13
1.2.1 The optical properties of semiconductors	13
CHAPTER 2	
Introduction	19
2.0 Types of junctions	19
2.1 The p-n junction	19
2.1.1 Basic structure of the p-n junction	19
2.1.2 The p-n junction with zero applied bias	24
2.1.3 The p-n junction with an applied bias	25
2.2 The n ⁺ -n and p ⁺ -p junction	27
2.3 Heterojunctions	28
2.4 Semiconductor Electrolyte Interface	33
2.5 Dye Sensitization	34
2.5.1 Dyes	38
2.5.2 Dye Coating Methods	40
2.5.3 Principles of Operation of Dye-Sensitized Solar cell	40

CHAPTER 3

3.0 Photophysical, photochemical and semiconducting properties of dye sensitized n-Cu₂O/p-CuSCN junction photoelectrode in solid state devices and photoelectrochemical cells	
3.1 Introduction	42
3.2 Experimental	44
3.3 Results and Discussion	45
3.3.1 Sample Characterization	45
3.3.1(a) Absorption properties of the sample	45
3.3.1(b) XRD Spectra and resistivity measurements	46
3.3.2 Energy Band Structures	47
3.3.3 New approach of Kinetics of Photocurrent generation of the dye sensitization in the solid state cell	47
3.3.4 Photocurrent action spectra of solid state cell	52
3.3.4.1 Efficient charge separation of n-Cu ₂ O/p-CuSCN	52
3.3.4.2 Photocurrent enhancement of n-Cu ₂ O/Dye/p-CuSCN solid state cell	53
3.3.4.3 Photocurrent enhancement of Cu/n-Cu ₂ O/Dye/p-CuSCN photoelectrode at electrolyte interface	53
3.3.4.4 VI characteristics of solid state cell	54
3.3.4.5 Time development of photocurrent	55
3.3.4.5.1 Solid state cell	55
3.3.4.5.2 Cu/n-Cu ₂ O/Dye/p-CuSCN-Electrolyte Interface	56
3.3.4.6 Dependence of parameter values of A,B with ϕ_{max} and D_{op} under the suppression of k_4 in the solid state photocell	57
Conclusions	76
References	77
