

ABREVIATIONS

N	- North
E	- East
km ²	- square kilometers
km	- kilometers
Fig.	- Figure
m	- meters
mm	- millimeters
⁰ C	- degrees centigrade
RH%	- relative humidity
m ³	- cubic meters
cm	- centimeters
i.e.	- that is
kg	- kilograms
ha	- hectares
Ca	- Calculated
No.	- Number
IPM	- Integrated Pest Management
IBM	- Integrated Biodiversity management
hrs.	- hours
m ²	- square meters
OF	- Organic based rice field
CF	- Chemical based rice field
Spp.	- Species

CONTENTS

	Page
ABSTRACT	I
ACKNOWLEDGEMENTS	V
ABBREVIATIONS	VIII
CHAPTER 1 – INTRODUCTION	1
1.1 Background	1
1.2 Objectives of the study	3
CHAPTER 2 - LITERATURE REVIEW	4
2.1 Geo-climatic background of Sri Lanka	4
2.2 Biodiversity of Sri Lanka	5
2.3 Biodiversity conservation in Sri Lanka	7
2.4 History of agriculture in Sri Lanka	8
2.5 Rice field biodiversity	9
2.5.1 Direct Benefits of rice field biodiversity	12
2.5.1.1 Biological control of rice pests	12
2.5.1.2 Nutrient generation for rice	13
2.5.2 Indirect benefits of biodiversity	14
2.6 Agro-ecological factors affecting rice field biodiversity	14
2.7 Human interference on rice field biodiversity	16
2.8 Rice cultivation in Sri Lanka	18
2.9 Ecology in rice cultivation	18
2.10 Agronomy of rice	20
2.11 Biodiversity conservation in rice fields	21

CHAPTER 3 - RESEARCH METHODOLOGY	22
3.1 Experimental Approach	22
3.2 Selection of the study site	22
3.3 Description of the study site	22
3.4 Materials and methods	24
3.4.1 Data collection	24
3.4.1.1 Fauna present in sampling plots	24
3.4.1.2 Agronomy of rice	27
3.4.1.3 Ecological data	27
3.4.2 Analysis of data	27
3.4.2.1 Taxonomic identification of fauna	27
3.4.2.2 Biometric analysis	28
CHAPTER 4 – RESULTS	30
4.1 Species richness	30
4.1.1 Richness in individual taxonomic groups	30
4.1.2 Overall species richness	36
4.2 Species density	40
4.3 Faunal feeding guilds	43
4.3.1 Composition of guild structure of invertebrates and vertebrates	43
4.3.2 Distribution of the feeding guilds of invertebrates during the four phases of rice	46
4.3.3 Distribution of the feeding guilds of vertebrates during the four phases of rice	48
4.3.4 Comparison of feeding guilds in the organic and chemical based rice fields	49

4.4	Relationship between rice cultivation phase and rice field faunal diversity	50
4.5	Species Similarity	51
4.6	Species Diversity and Evenness	52
4.7	Variation in climatic factors during the study period	54
4.8	Comparison of growth performance and yield of rice in organic and chemical based rice fields	55
4.9	Gross margin analysis of paddy cultivation	57
CHAPTER 5 – DISCUSSION		59
5.1	Species richness	59
5.2	Species density	61
5.3	Faunal feeding guilds	61
5.4	Species similarity	63
5.5	Species diversity and evenness	63
5.6	Growth performance and rice yield	63
CHAPTER 6 – CONCLUSION		65
REFERENCES		67
APPENDICES		81
Appendix 1. Checklist of invertebrate fauna recorded from the organic rice field		81
Appendix 2. Checklist of invertebrate fauna recorded from the chemical rice field		84
Appendix 3. Checklist of vertebrate fauna recorded from the organic rice field		87
Appendix 4. Checklist of vertebrate fauna recorded from the chemical rice field		89
Appendix 5. Tables of statistical analysis		91

LIST OF FIGURES

	Page
Figure 3.1: Map of the Matara district showing the Komangoda paddy fields	23
Figure 3.2: Positioning of the organic and chemical based study sites	24
Figure 3.3: Sweep netting in rice field for insect sampling	25
Figure 3.4: Water pan Trap	26
Figure 3.5: Light Trap	26
Figure 4.1: Cumulative number of species observed in the Organic based rice field	37
Figure 4.2: Cumulative number of species observed in the Chemical based rice field	37
Figure 4.3: Density of Insects in various cultivation phases of rice	41
Figure 4.4: Density of other invertebrates in various cultivation phases of rice	42
Figure 4.5: Density of vertebrates in various cultivation phases of rice	42
Figure 4.6: Invertebrates feeding guilds observed during the four phases of rice cultivation	47
Figure 4.7: Insects feeding guilds observed during the four phases of rice cultivation	47
Figure 4.8: Feeding guilds of vertebrates observed during the four phases of rice cultivation	48
Figure 4.9: Feeding guilds of birds observed during the four phases of rice cultivation	48
Figure 4.10: Total faunal guilds observed in the organic based rice field	49
Figure 4.11: Total faunal guilds observed in the chemical based rice field	49
Figure 4.12: Total number of species observed in the organic based rice field during various phases of rice cultivation	50
Figure 4.13: Total number of species observed in the chemical based rice field during various phases of rice cultivation	51
Figure 4.14: Species diversity and evenness during the vegetative phase of the rice fields..	53

Figure 4.15: Species diversity and evenness during the reproductive phase of the rice fields	53
Figure 4.16: Species diversity and evenness during the ripening phase of the rice fields ...	53
Figure 4.17: Species diversity and evenness during the fallow phase of the rice fields	54
Figure 4.18: Variation of the climatic conditions of the area during the study period	54
Figure 4.19: Photographic view of the organic based paddy field	56
Figure 4.20: Photographic view of the chemical based paddy field	56
Figure 4.21: A close view of rice plants showing the spacing and tillering habit in rice fields	56

LIST OF TABLES

	Page
Table 2.1: Agricultural land usage	9
Table 4.1: Number of Annelids observed during various phases of rice cultivation	31
Table 4.2: Number of Mollusks observed during various phases of rice cultivation	31
Table 4.3: Number of Crustaceans observed during various phases of rice cultivation	32
Table 4.4: Number of Arachnids observed during various phases of rice cultivation	32
Table 4.5: Number of Myriapods observed during various phases of rice cultivation	33
Table 4.6: Number of Insects observed during various phases of rice cultivation	33
Table 4.7: Number of Fish observed during various phases of rice cultivation	34
Table 4.8: Number of Amphibians observed during various phases of rice cultivation	34
Table 4.9: Number of Reptiles observed during various phases of rice cultivation	35
Table 4.10: Number of Birds observed during various phases of rice cultivation	35
Table 4.11: Number of Mammals observed during various phases of rice cultivation	36
Table 4.12: Total number of individuals recorded from different taxonomic groups during the study period in the two types of rice fields	38
Table 4.13: Major taxonomic groups observed in rice fields	38
Table 4.14: Number of vertebrate species observed in rice fields	39
Table 4.15: Number of invertebrate species observed in rice fields	39
Table 4.16: Species density in various rice cultivation phases	41
Table 4.17: Guild structure of invertebrates, based on feeding habits	43
Table 4.18: Guild structure of vertebrates, based on feeding habits	45
Table 4.19: Sorenson's Similarity indices for different taxa	52
Table 4.20: Growth performance and average yield of rice in organic and chemical based rice fields	55
Table 4.21: Gross margin analysis of paddy production in organic and inorganic based rice cultivation	57
