List of Figures.....	VII
List of Abbreviations.....	VIII
Abstract	X
Chapter 01: INTRODUCTION.....	01
Chapter 02: LITERATURE REVIEW.....	05
2. 1. Poultry industry in Sri Lanka.....	05
2. 2. Poultry nutrition.....	07
2. 2. 1. Nutrients.....	07
2. 2. 2. Energy.....	07
2. 2. 3. Fats and oils.....	08
2. 2. 4. Carbohydrates.....	09
2. 2. 5. Protein.....	09
2. 2. 5. 1. Lysine.....	10
2. 2. 5. 2. Methionine and Cystine.....	10
2. 2. 6. Mineral.....	10
2. 2. 7. Vitamin.....	11
2. 2. 8. Water.....	11
2. 3. Poultry feed ingredients.....	14
2. 4. Rice bran.....	17
2. 4. 1. Rice bran production in Sri Lanka.....	18
2. 4. 2. Gross nutrients composition of rice bran.....	19
2. 4. 3. Use of rice bran in poultry diets.....	20
2. 4. 4. Effects of dietary rice bran on poultry.....	21

2. 4. 5. Anti-nutrients in rice bran.....	23
2. 4. 5. 1. Phytate.....	23
2. 4. 5. 1. 1. Means of mitigating adverse effects of phytate.....	27
2. 4. 5. 1. 1. 1. Use of exogenous enzymes.....	27
2. 4. 5. 1. 1. 1. 1. Phytase.....	28
2. 4. 5. 1. 1. 2. Citric acid.....	36
2. 4. 5. 1. 1. 3. Other methods to reduce the adverse effects of phytate.....	36
2. 4. 5. 2. Anti-proteolytic substances.....	37
2. 4. 5. 3. Non starch polysaccharides.....	38
2. 4. 5. 4. Fiber.....	38
2. 4. 5. 4. 1. Cellulose.....	38
2. 4. 5. 4. 2. Hemicellulose.....	39
2. 4. 5. 5. Lipases and Rancidity.....	40
2. 4. 5. 5. 1. Lipase.....	40
2. 4. 5. 5. 2. Rancidity.....	41
2. 4. 5. 5. 2. 1. Hydrolytic Rancidity.....	41
2. 4. 5. 5. 2. 2. Oxidative rancidity.....	41
2. 4. 5. 5. 3. Problems of rice bran rancidity in animal nutrition.....	42
2. 4. 5. 5. 4. Stabilization of rice bran.....	43
2. 5. Methods to increase dietary rice bran inclusion level in the poultry diets.....	44
2. 6. Citric acid.....	44
2. 6. 1. Role of citric acid in prevention of rancidity.....	45
2. 6. 2. Use of citric acids in animal feeds.....	46
Chapter 03: EXPERIMENTS.....	52
3. 1. Experiment 01:	52
3. 1. 1. Abstract.....	52
3. 1. 2. Introduction.....	52
3. 1. 3. Materials and methods.....	54
3. 1. 3. 1. Determination of pH value.....	54
3. 1. 3. 2. Determination of the Peroxide Value.....	55
3. 1. 4. Results and discussion.....	55

3. 2. Experiment 02:	62
3. 2. 1. Abstract.....	62
3. 2. 2. Introduction.....	62
3. 2. 3. Materials and methods.....	63
3. 2. 3. 1. Statistical analysis.....	65
3. 2. 4. Results and discussion.....	66
3. 3. Experiment 03:	74
3. 3. 1. Abstract.....	74
3. 3. 2. Introduction.....	74
3. 3. 3. Materials and methods.....	76
3. 3. 3. 1. Statistical analysis.....	77
3. 3. 4. Results and discussion.....	77
Chapter 04: CONCLUSIONS.....	88
Chapter 05: REFERENCES.....	89

LIST OF TABLES

Title of table	Page number
Table 2. 1: Macro and micro minerals in poultry.....	10
Table 2. 2: Guidelines for poultry for the suitability of water with different Concentrations of Total Dissolved Solids	12
Table 2. 3: Water consumption by chickens of different ages.....	13
Table 2. 4: Nutrient composition of some selected feed ingredients used in Sri Lankan poultry rations.....	14
Table 2. 5: Nutrient requirements of immature leghorn-type chickens.....	15
Table 2. 6: Nutrient requirements of broilers.....	16
Table 2. 7: Vitamin composition of rice bran.....	19
Table 2. 8: Nutrient composition of rice bran as reported by several authors.....	20
Table 2. 9: Phytate phosphorus content of some common poultry feed ingredients.....	25
Table 2. 10: Summary of phytase supplementation of diets for five week old broilers....	29
Table 2. 11: Summary of phytase supplementation of diets for poultry.....	30
Table 2. 12: The effect of phytase supplementation (0–12,000 FTU kg ⁻¹) on growth performance, nutrient utilization, bone mineralization, energy utilization and total tract phytate-P degradation in broilers	32
Table 2. 13: Effects of phytase supplementation on energy utilization in broiler chickens.....	33
Table 2. 14: Summary of phytase supplementation of diets for laying hens.....	34
Table 2. 15: Properties of lipase.....	40
Table 2. 16: Chemical and physical properties of citric acid.....	46
Table 2. 17: Summary of citric acid supplementation of diets for poultry.....	48
Table 2. 18: Effects of available phosphorus level and citric acid level on chicks consuming a P- deficient corn-soybean meal diet.....	50
Table 2. 19: Effect of citric acid and available phosphorus on performance of laying hens fed corn-soybean meal diets from 22 to 40week of age.....	51
Table 3. 1: Peroxide value of RB during storage as affected by three levels of CA and BHT.....	56
Table 3. 2: The pH values of RB during storage as affected by three levels of CA and BHT.....	59

Table 3. 3:	Ingredients composition and the nutrient compositions of the experimental diets (Experiment 02).....	64
Table 3. 4:	Effects of dietary rice bran and citric acid levels on the feed intake and weight gains of broiler finisher chickens.....	70
Table 3. 5:	Effect of dietary citric acid on the feed conversion ratio and pH values of the feed and digesta that collected from different regions of the digestive tract of the broiler chickens.....	71
Table 3. 6:	Effect of dietary RB and CA levels on ash, N and dry matter retention of broiler finishers.....	72
Table 3. 7:	Carcass parameters as affected by the dietary RB and CA levels.....	73
Table 3. 8:	Ingredient composition and calculated nutrient compositions of the experimental diets (Experiment 03).....	76
Table 3. 9:	Growth performances from day 21 to 42 and pH of the feeds and digesta of crop and gizzard of broiler chicken as affected by dietary RB, CA and NPP levels	80
Table 3. 10:	Effects of dietary factors on the organ weight of broiler finisher chickens.....	81
Table 3. 11:	Effects of dietary RB, CA and NPP on nutrient retention and tibia ash percentage of broiler chickens.....	83
Table 3. 12:	Effects of dietary RB, CA and NPP levels on the feed intake of broiler finisher chickens.....	85
Table 3. 13:	Effects of dietary RB, CA and NPP on the weight gain of broiler finisher chickens.....	86
Table 3. 14:	Effects of dietary RB, CA and NPP on the FCR of broiler finisher chickens.....	87

LIST OF FIGURES

Title of figure	Page number
Figure 2. 1: Variation of annual egg production in Sri Lanka	06
Figure 2. 2: Variation of annual chicken meat production in Sri Lanka	06
Figure 2. 3: Disposition of dietary energy ingested by a laying hen.....	08
Figure 2. 4: A longitudinal section of rice kernel.....	17
Figure 2. 5: Product fractions from standard milling of rice.....	18
Figure 2. 6: Structure of phytic acid.....	24
Figure 2. 7: Phytate-protein-starch complex molecule: a potential structure.....	26
Figure 2. 8: The action of phytase releasing orthophosphate from phytic acid.....	27
Figure 2. 9: Structures of the citric acid.....	45
Figure 3. 1: Peroxide value of rice bran stored with 0, 200 and 400ppm of BHT.....	58
Figure 3. 2: Peroxide value of rice bran stored with 0%, 2% and 4% of citric acid.....	58
Figure 3. 3: Relationship between pH and peroxide values during storage of raw rice bran.....	60
Figure 3. 4: pH values of rice bran stored with 0, 200 and 400ppm of BHT.....	60
Figure 3. 5: pH values of rice bran stored with 0%, 2% and 4% of citric acid.....	61
Figure 3. 6: Effects of dietary RB and CA levels on feed intake of broiler chicken from day 21 to 42.....	66
Figure 3. 7: Effects of dietary RB and CA levels on weight gain of broiler chicken from day 21 to 42.....	67
