

UNIVERSITY OF RUHUNA

BACHELOR OF SCIENCE IN MARINE AND FRESH WATER SCIENCES

BACHELOR OF SCIENCE IN FISHERIES AND MARINE SCIENCES

EXAMNATION JULY/AUGUST, 2017

LEVEL-I, SEMESTER-I

CHM 1111 – Principles in Chemistry: paper II

Time: one (1) hour

(85 marks)

Paper II

Index number:

Answer **all** the questions.

Write answers on this question paper

01. Answer **all** parts.

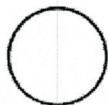

- (a) (i) Out of the following four sets of quantum numbers, select the incorrect ones and give reason(s) for your answer(s).

	n	l	m_l	m_s
(I)	3	2	-2	+1/2
(II)	9	5	6	+1/2
(III)	2	1	0	+1
(IV)	2	0	0	+1/2

(15 marks)

- (ii) Out of the following figures which one represents an orbital with an azimuthal quantum number (ℓ) equals to 1?

(I)

(II)

(III)

(IV)

(05 marks)

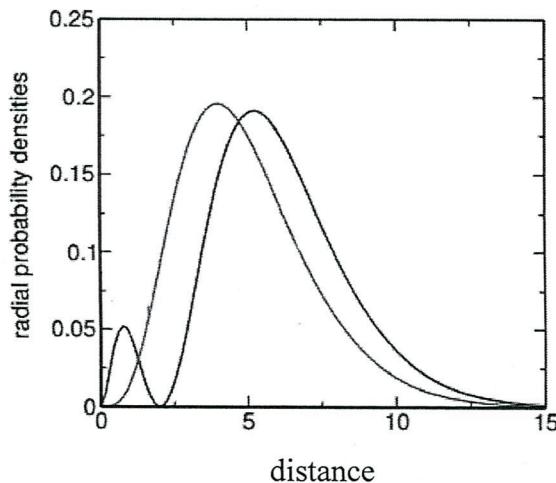

- (b) By using the quark model, show that the charge of a proton is +1 .

(10 marks)

2. Answer **all** parts.

- (a) Radial probability density function curves for the principal quantum number $n=2$ state are given in the following diagram.

Answer the following questions based on the above diagram.

- (i) Assign the relevant value(s) of azimuthal quantum number(s) ℓ , for each of the radial probability density function curves shown in the above diagram.

(10 marks)

- (ii) Which orbital gives the greater probability for the electron to be found closer to the nucleus?

(05 marks)

- (b) (i) Atomic number of silicon is 14. Shielding constant for a 3p electron in silicon is 9.85. Calculate the effective nuclear charge for a 3p electron in silicon.

(05 marks)

- (b) (i) State the molecular orbital energy levels in the increasing order of energy for O_2^{2-} ion.

.....
.....
.....
.....
.....

(10 marks)

- (ii) What is the bond order of O_2^{2-} ion?

.....
.....

(05 marks)

- (iii) Giving reasons indicate whether O_2^{2-} ion is diamagnetic or paramagnetic.

.....
.....
.....

(05 marks)
