Abstract	xi
1. Introduction	1
2. Review of literature	3
2.1. Factors affecting the yield and quality of pasture	3
2.1.1 Plant factor	3
2.1.2 Animal factor	6
2.1.3 Soil factor	6
2.2 Intercropping system with pastures and other crops	8
2.2.1. Pasture under coconut	8
2.2.2. Suitability of coconuts for intercropping	9
2.3 Cattle production from pasture under coconut	10
2.3.1. Grazing capacity	10
2.3.2 Live weight gain and stocking rate	10
2.3.3. Milk production	11
2.4 Forage production pattern and alternative feed sources	13
2.4.1. Alternative feed sources	15
2.4.2. Crop residues and agro-industrial by- products	15
2.4.3. Utilization of rice straw as a ruminant	

feed	16
2.4.4. Chemical composition of rice straw	16
2.4.5. Intake and utilization of rice straw	19
2.4.5.1. Physical treatment	20
2.4.5.2. Chemical and biological treatment	20
2.4.5.2.1. Alkali treatment of rice straw	21
2.4.5.2.2. Ammonia treatment of rice straw	21
2.4.5.2.3. Urea treatment of rice straw	22
2.4.5.3 Supplementation of rice straw	23
2.4.5.3.1 Molasses supplementation of rice straw	24
2.5. Dry matter intake and animal performance of rice straw	25
2.6. Rice straw for cattle grazing natural herbage under coconut	26
3. Materials and methods	29
3.1.1. Location	29
3.1.2. Duration of the experiment	29
3.2. Experimental design	29
3.3. Preparation of the experimental diets and their composition	30
3.3.1 Diets	30
3.3.2 Dietary composition	31
3.3.3 Preparation of diets	31
3.4. Animals and their management	32
3.4.1. Animals	32

3.4.2. Management	34
3.4.2.1. Grazing system	34
3.4.2.2. Feeding system	34
3.5. Collection of data and calculations	34
3.5.1. Intake of straw	34
3.5.2. Intake of supplements	35
3.5.3. Live weight of animals	35
3.5.4. Botanical composition	35
3.5.5. Herbage yield	36
3.5.6. Rainfall and minimum maximum temperature	36
3.5.7. Subjective observations	36
3.6 Collection of samples and laboratory analysis	36
3.6.1. Laboratory analysis	37
3.6.1.1. Crude protein crude fibre and ether extract	37
3.6.1.2. Dry matter	37
3.7 Statistical analysis	38
4. Results and discussion	39
4.1. Chemical composition of feed ingredients	39
4.2. Straw DM and supplement intake	42
4.2.1. Relationship between straw DM intake and rainfall	45
4.2.2. DM intake of straw as a percent of live weight	47
4.2.3. Straw DM intake on metabolic body weight	49
4.2.4. Intake of supplements	51
4.3 live weight data	51
4.3.1. Live weight of animals	51

4.3.2. Live weight gain (g/head/day)	57
4.3.3. Relationship between rainfall and average daily gain	59
4.3.4. Live weight gain (kg/head/year) during whole experimental period	61
4.3.5 Live weight gain (kg/ha/year) during whole experimental period	61
4.4 Herbage DM yield	64
4.4.1. Herbage dry matter yield during whole experimental period	67
4.4.2. Relationship between rainfall and herbage dry matter yield	67
4.4.3. Relationship between herbage DM yield and average daily gain	69
4.5. Botanical composition	73
4.6. General discussion	75
5. Conclusions	77
6. Appendices	78
7. Bibliography	106

## LIST OF FIGURES

	<u>Page no</u>
1. Intake and utilization of rice straw	19
2. Field lay out of the experiment	30
3. Average straw DM intake for different months during entire experimental period	44
4. Relationship between straw DM intake and rainfall	46
5. Monthly changes in straw DM intake as a percent live weight	48
6. Monthly changes of straw DM intake on metabolic body weight basis during whole experimental period	50
7. Monthly live weight of animals over 18 months experimental period	54
8. Metabolic body weight of animals for different months over 18 months experimental period	56
9. Average live weight changes (g/head/day) of animals during different months of the experimental period.	58
10. Relationship between rainfall and average daily gain of animals	60
11. Monthly changes of herbage dry matter yield	66
12. Relationship between rainfall and herbage DM yield	68
13. Relationship between herbage DM yield and average daily gain in G group	70
14. Relationship between herbage DM yield and average daily gain in GS group	71

15. Relationship between herbage DM yield and  
average daily gain in GSS group
