

TABLE OF CONTENTS

Acknowledgements	i
Abstract	1
Introduction	5
1.0 Section 1	11
1.1 General	11
1.2 Literature review	13
1.2.1 Vegetable protein as substitutes for fish meal	13
1.2.2 Prediction of amino acid requirements	16
1.3 Materials and methods	19
1.3.1 Experiment 1	20
1.3.2 Experiment 2	20
1.3.3 Feed preparation	25
1.3.4 Faecal collection	25
1.3.5 Carcass analysis	26
1.3.6 Chemical analysis	26
1.3.7 Amino acid analysis	27
1.4 Results	28
1.4.1 Mortality	28
1.4.2 Digestibility	28
1.4.3 Growth	31
1.4.4 Feed conversion ratio and protein efficiency ratio	42
1.4.5 Protein and lipid deposition	45

1.4.6 Whole body amino acid composition	52
1.5 Discussion	57
2.0 Section 2	70
2.1 General	70
2.2 Literature review	71
2.3 Materials and methods	80
2.3.1 Diet preparation	81
2.3.1.1 Mineral mixture	81
2.3.1.2 Vitamin mixture	82
2.3.1.3 Amino acid mixture	82
2.3.1.4 Basal premix	82
2.3.1.5 Preparation of experimental diets	83
2.3.2 Alanine aminotransferase activity of liver	89
2.3.3 Vitamin C content of liver and kidney	90
2.3.4 Tissue analysis of total lipids and fatty acids	90
2.3.5 Haematocrit and haemoglobin	91
2.3.6 Histopathology	91
2.3.6.1 Preparation of blood smears	92
2.3.6.2 Preparation of tissue sections of liver, kidney and gills	92
2.3.7 Immune response studies	92
2.4 Results	94
2.4.1 Fish behaviour and external deficiency symptoms	94

2.4.2	Growth and feed conversion rates	95
2.4.3	Liver alanine aminotransferase activity	96
2.4.4	Vitamin C content of liver and kidney	113
2.4.5	Haematological analysis	117
2.4.6	Histopathology	117
2.4.7	Immune response	128
2.4.8	Total lipids and fatty acids	128
2.5	Discussion	141
3.0	Section 3	149
3.1	Literature review	149
3.1.1	Vitamin C (Ascorbic acid)	149
3.1.2	Vitamin E (alpha-tocopherol)	152
3.2	Materials and methods	157
3.2.1	Determination of vitamin C content of liver and kidney	160
3.2.2	Determination of vitamin E content of liver and muscle	160
3.2.3	Haematocrit study	160
3.2.4	Immuno assay	160
3.3	Results	166
3.3.1	Fish behaviour	166
3.3.2	Growth and feed conversion	166
3.3.3	Vitamin C deposition in liver and kidney	173

3.3.4 Vitamin E deposition of liver and muscle	174
3.3.5 Haematocrit studies	194
3.3.6 Immuno assay	196
3.4 Discussion	197
Conclusion	207
References	213
Annexures	
1.0 Determination of alanine aminotransferase activity	241
2.0 Determination of vitamin C content	243
3.0 Determination of contents of total lipids, lipid classes and fatty acids	245
4.0 Determination of haemoglobin content	251
5.0 Staining procedure for blood smears and tissue sections of liver, kidney and gills	253
6.0 Improved Spectrophotometric assay for vitamin E	255
7.0 Determination of amino acids in whole body tissue using automated ion exchange amino acid analyzer	259
