

## C O N T E N T S

	P a g e
Chapter I THEORETICAL BACKGROUND	1
1.1 Introduction	1
1.2 Properties of Semiconductors	3
1.2.1 Energy Levels	3
1.2.2 Electrical Conductivity of Semiconductors	4
1.2.3 Temperature Dependence of Conductivity	5
1.2.4 Ionic Conductivity	6
1.2.5 Conductivity Measurements	6
1.2.6 Recombination	7
1.3 Polycrystalline Thin Films for solar Devices	9
1.3.1 Growth of Polycrystalline Thin Films	10
1.3.2 Electrical Transport Properties of Polycrystalline Thin Films	12
1.4 Solar Efficiency	13
1.5 Quantum Efficiency	14
1.6 Junctions	15
1.6.1 Homojunctions	16
1.6.2 Heterojunctions	17
1.6.3 Semiconductor-Electrolyte Junctions	19
1.7 Photoelectrochemical Cells	20
1.7.1 Energy Balance in Photoelectro- chemical Devices	21
1.7.2 Flat Band Potential	23
1.7.3 Hydrogen Production by Water Splitting	25

	P a g e
1.7.4 Photocatalytic Cells	27
1.8 Dye Sensitization Effects at the Semiconductor Interfaces	29
Chapter II p-Cu <sub>x</sub> S/n-β-CuCNS SOLAR CELL	51
2.1 Introduction	51
2.2 Preparation of β-CuCNS	51
2.3 Analysis of β-CuCNS	53
2.3.1 Chemical Measurements	53
2.3.2 Conductivity and Photoelectro- chemical Measurements	53
2.3.3 Results and Discussion	54
2.3.4 Summery	55
2.4 Properties of Cu <sub>x</sub> S	56
2.5 Preparation of p-Cu S/n-β-CuCNS Solar Cell	57
2.6 Results and Discussion	57
Chapter III SEMICONDUCTOR LIQUID JUNCTION SOLAR CELLS	68
3.1 Introduction	68
3.2 Wet Solar Cell with a p-Cu <sub>x</sub> S/n-CdS Junction Photocathode	68
3.2.1 Experimental	68
3.2.2 Results and Discussion	69
3.3 β-CuCNS Photoanode	71

	P a g e
Chapter IV	
DYE SENSITIZATION EFFECTS AT THE SEMICONDUCTOR	
INTERFACES	78
4.1 Introduction	78
4.2 Dye Sensitized Wet Type Photocell	79
4.2.1 Experimental	79
4.2.2 Results and Discussion	80
4.3 Dye Sensitized Solid State Cell	81
4.3.1 Experimental	81
4.3.2 Results and Discussion	81
 Chapter V	
PHOTOCATALYSIS	94
5.1 Introduction	94
5.2 Photocleavage of Water with Silver Phosphate	95
5.2.1 Experimental	95
5.2.2 Results and Discussion	96
5.3 Selective Photoreduction of Carbon Dioxide	
to Methanol with Hydrous Cuprous Oxide	99
5.3.1 Experimental	99
5.3.2 Results and Discussion	100
 References	113
General References	119
List of Publications	120
