

UNIVERSITY OF RUHUNA

FACULTY OF GRADUATE STUDIES

Master of Business Administration Degree Programme

Part II - First Semester End Examination – February 2021

Academic Year 2020/2021

MBA 201: Financial Management

Total Marks: 60

Duration: Three hours

- The question paper contains five (5) questions.
- Answer all questions.
- Scientific calculators are allowed.

-
- (1) (i) What is meant by financial management? (2 Marks)
- (ii) Briefly describe the main functions of a finance manager. (2 Marks)
- (iii) Assume that you deposit Rs. 50,000 in a savings account at the beginning of each year for 5 years to earn 10% interest per annum. Calculate the future value of this investment at the end of 5 years. (2 Marks)
- (iv) Mihiranga has an opportunity of receiving following cash flows. If the applicable interest rate is 12% calculate the future value of this cash flow series at the end of year 4. (2 Marks)

Year	Cash flows
1	Rs. 100,000 (End of the year)
2	Rs. 200,000 (Beginning of the year)
3	Rs. 300,000 (Beginning of the year)
4	Rs. 400,000 (End of the year)

- v) Assume that you are going to obtain Rs.1,000,000 housing loan with an interest of 8% per year. Assume the period of the loan is 3 years and equal installments payments are made at the end of each year.

Required

- (a) Calculate the annual installment required to repay this loan.
(b) Prepare a loan amortization schedule

(4 Marks)
(Total 12 Marks)

(2) (i) A company has 1,340,000 ordinary shares of Rs. 10.00 each issued at par outstanding. Further, the company has issued 100,000 bonds with a face value of Rs. 100.00 each. The bonds have a coupon rate of 12% and a redemption value of Rs. 110.00. The company has paid Rs. 5.00 dividend last year and the dividend is expected to grow at a constant rate of 10%. The ordinary shares are currently selling in the market at Rs. 27.50 per share. The bonds have 5 years to maturity and are currently selling in the market at Rs. 95.00. Assuming a 30% corporate tax rate, you are required to,

- (a) Calculate the cost of equity. (1 Mark)
 (b) Calculate the cost of bonds. (2 Marks)
 (c) Calculate the overall cost of capital of the company using market values. (3 Marks)

(ii) A 5-year bond with a face value of Rs. 1000 bearing a coupon rate of 7% is selling at Rs. 750 in the market. This bond has a redemption value of Rs. 1100. An investor with a 10% required rate of return wants to invest in this bond. You are required to advise this investor while showing necessary calculations. (3 Marks)

(iii) Briefly explain the following concepts.

- (a) Interest rate risk.
 (b) Default risk.
 (c) Liquidity premium. (3 Marks)

(Total 12 Marks)

(03) (a) Commercial investment company is considering two mutually exclusive projects for investment. An initial investment of Rs. 2.2 million is required for project A, whereas project B requires Rs. 1.5 million. Both projects have an estimated life time of 5 years and there is no salvage value. The relevant capital allowance for the both projects is 20%.

The estimated profit before depreciation from the investment projects are as follows.

Years	Project A (Rs. '000)	Project B (Rs. '000)
1	500	600
2	500	300
3	500	400
4	500	400
5	500	800

Required

- (i) Calculate the followings for these two projects.
- Payback period (PB) (2 Marks)
 - Net present value (NPV) (4 Marks)
- (ii) Give your recommendation to the management about the acceptance of these projects based on the calculates made in above (i)

(1 Marks)

(b) The following information has been extracted from the books of Roland Company for the year ended 31st December 2020.

Sales revenue for the year	Rs. 2,000,000
<u>Costs as a percentage of sales</u>	
Direct Materials	40%
Direct Labour	15%
Variable Overhead	15%
Fixed Overhead	10%
Selling and Distribution	6%

Average statistics relating to working capital are as follows.

- (i) Receivables take 3 months to pay.
- (ii) Raw materials are in inventory for 3 months.
- (iii) Work- in- process represents 1.5 months' half- produced goods.
- (iv) Finished goods represent 1.5 months production.
- (v) Credit is given by material suppliers and service providers as follows.

Materials	2.5 months
Direct Labour	1 month
Variable Overhead	1.5 months
Fixed Overhead	1.5 months
Selling and Distribution	0.5 month

Work-in-process and finished goods are valued at the cost of material, labour and variable overhead.

Required

Prepare a statement showing the working capital requirement of the Roland Company.

(5 Marks)

(Total 12 Marks)

(04) (a) A firm has expected annual net operating income of Rs. 150,000. The cost of equity capital is 12%. The firm has a debt capital of Rs. 800,000 bearing 6% rate of interest. Using net income approach,

- (i) Calculate the value of the firm.
- (ii) If the firm employed a debt capital of Rs. 1 million instead of Rs. 800,000, calculate the value of the firm.

(2 Marks)

(b) Ruwan PLC with a net operating income of Rs. 380,000 is attempting to evaluate a number of capital structures as follows.

Capital structures	Debt capital in capital structure	Kd%	Ke%
P	450,000	10	12.5
Q	490,000	10	12.5
R	620,000	11	13.5
S	750,000	12	15
T	880,000	14	18

Required

Which of these capital structures will you recommend? Justify your answer.

(4 Marks)

(c) Kusal PLC needs Rs. 1.2 million for an expansion of their plant capacity to meet the growing demand. Assume a 50% corporate tax rate. The following three financial plans are feasible.

1. The PLC may issue 48,000 ordinary shares at Rs. 25 per share.
2. The PLC may issue 24,000 ordinary shares at Rs. 25 per share and 12% debentures of Rs. 600,000.
3. The PLC May issue 12,000 ordinary shares at Rs. 25 per share and 14% preference shares capital of Rs. 900,000 .

Required

- (i) Calculate the indifference point between 1st Plan and 2nd Plan. (1 Mark)
- (ii) Calculate the indifference point between 1st plan and 3rd plan. (1 Mark)
- (iii) If earnings before interest and taxes (EBIT) is Rs. 288,000, calculate earnings per share (EPS) for each plan. (2 Marks)
- (iv) Which of these plans should be recommended? Justify your answer. (2 Marks)

(Total 12 Marks)

(5) (i) Asset betas for Alpha PLC and Zigma PLC is 0.5 and 1.5 respectively. The standard deviation of the returns on Alpha PLC shares is 12% and the standard deviation of the returns on Zigma PLC shares is 18%. The risk-free rate in the market is 4% and the market return is 19%.

(a) Calculate the expected returns of the two companies separately based on Capital Assets Pricing Model. (1 Mark)

(b) In what combination should an investor hold these two shares to earn a required rate of return of 22%? (2 Marks)

(c) If you plan to invest 60% of your wealth in the shares of Alpha PLC and the balance in Zigma PLC shares, calculate the portfolio return and risk, if the correlation coefficient between the returns of two shares is -0.5. (3 Marks)

(ii) Briefly discuss three main factors to be considered when designing a dividend policy. (3 Marks)

(iii) Briefly explain how you would design your firm's dividend policy based on Walters's approach. (3 Marks)

(Total 12 Marks)

Present value and Future value tables
