| ABSTRACT   | XI      |
| 1. INTRODUCTION  | 1       |
| 2. LITERATURE REVIEW   | 5       |
| 2.1 History  | 5       |
| 2.1.1 Early History  | 5       |
| 2.1.2 Modern History   | 7       |
| 2.2 Main Producing Areas and Extents                         | 10      |
| 2.3 Production Systems, Holding Size and Age of Cultivations | 11      |
| 2.4 Botany and morphology                                    | 12      |
| 2.4.1 Cytology   | 12      |
| 2.4.2 Structure of the plant                                 | 13      |
| 2.4.2.1 Leaves   | 13      |
| 2.4.2.2 Inflorescence and flowers                            | 14      |
| 2.4.2.3 Fruits   | 14      |
| 2.4.3 Cultivars  | 14      |
| 2.5 Ecology  | 15      |
| 2.5.1 Climate  | 15      |
| 2.5.2 Soil   | 15      |
| 2.5.3 Altitude   | 15      |

|   |    |
|---|----|
| 2.6 Uses of Cinnamon product                | 15 |
| 2.6.1 Cinnamon in culinary                  | 15 |
| 2.6.2 Cinnamon as a spice                   | 16 |
| 2.6.3 Medicinal uses                        | 18 |
| 2.6.4 Synergistic and suppressive effects   | 20 |
| 2.6.5 Cinnamon -in perfumes and beauty care | 21 |
| 2.6.6 Cinnamon -an antimicrobial agent      | 21 |
| 2.6.7 Cinnamon-an antioxidant               | 22 |
| 2.6.8 Cinnamon -in home remedies            | 22 |
| 2.6.9 Industrial uses                       | 23 |
| 2.7 Harvesting of Cinnamon                  | 24 |
| 2.8 Yield                                   | 25 |
| 2.9 Production process                      | 26 |
| 2.10 Cinnamon Products                      | 31 |
| 2.10.1 Cinnamon quills                      | 31 |
| 2.10.2 Quillings                            | 31 |
| 2.10.3 Featherings                          | 32 |
| 2.10.4 Chips                                | 32 |
| 2.11 Quality of Cinnamon Bark Products      | 32 |
| 2.12 Grading                                | 36 |

|                                 |    |

## LIST OF TABELS

|  |    |
|--|----|
| Table 2.1: Distribution of the cinnamon in major producing districts   | 10 |
| Table 2.2: Factors affecting the quality of Cinnamon bark products<br>at different points of the trade channel | 35 |
| Table 2.3: Classification of cinnamon quills   | 36 |
| Table 3.1.1:1 Technical parameters of cinnamon bush and<br>harvested cinnamon sticks                           | 47 |
| Table 3.1.2:1 Time consumption for removing knots  | 55 |
| Table 3.1.2.2: Time consumption for scraping   | 57 |
| Table 3.1.2.3: Time consumption for rubbing  | 59 |
| Table 3.1.2.4: Time consumption for peeling  | 61 |
| Table 3.1.2.5: Time consumption for each processing steps  | 64 |
| Table 3.1.4.1: Sampling sites in Matara and Galle districts  | 70 |
| Table 3.1.4.2: Diameter ranges of the cinnamon sticks  | 71 |
| Table 3.1.4.3: Variation of the mean diameter  | 71 |
| Table 3.2.1.1: Technical specification of REWEKACG   | 77 |
| Table 3.2.1.2: Dimensional changes of the each element<br>in the scale up process                              | 83 |
| Table 3.2.1.4: Average time requirement to rub   | 85 |
| Table 3.2.1.5: Stroke difference of the two cinnamon rubbing device  | 85 |
| Table 3.2.2.1 Mean values for time consumption for insertion sticks  | 93 |
| Table 3.2.3.1: Time consumption for manual and machine rubbing   | 96 |

## LIST OF FIGURE

|   |    |
|---|----|
| Figure 2.1: Histogram of Cinnamon Holdings Size                           | 11 |
| Figure 2.2: Histogram of Age of Cinnamon Holdings                         | 12 |
| Figure 2.3: <i>Cinnamomum verum</i> : Cinnamon                            | 13 |
| Figure 2.4: Flow diagram of cinnamon processing and products              | 26 |
| Figure 2.5: Steps of cinnamon Peeling                                     | 28 |
| Figure 2.6: Historical Photographs about cinnamon processing              | 29 |
| Figure 2.7: The Banner  | 30 |
| Figure 2.8: Cinnamon products   | 31 |
| Figure 2.9: Grading of cinnamon quills                                    | 37 |
| Figure 3.1: Floor diagram of experimentation                              | 40 |
| Figure 3.1.1.1: Variation of Canopy height of cinnamon bushes             | 43 |
| Figure 3.1.1.2: Variation of usable shoot length                          | 44 |
| Figure 3.1.1.3: Variation of shoots per bush                              | 44 |
| Figure 3.1.1.4: Number of shoots harvest                                  | 45 |
| Figure 3.1.1.5: Variation of convenient processing length                 | 45 |
| Figure 3.1.1.6: Variation of knots per stick                              | 46 |
| Figure 3.1.1.7: Variation of stick weight                                 | 46 |
| Figure 3.1.2.1: Kattha  | 49 |
| Figure 3.1.2.2: Modified Kokattha   | 50 |
| Figure 3.1.2.3: Stick after rubbing process                               | 51 |
| Figure 3.1.2.4: Small knife used for peeling                              | 52 |
| Figure 3.1.2.5: Difference between unpeelable bark and peelable bark      | 52 |
| Figure 3.1.2.6: Detail description of time consumption for removing knots | 54 |
| Figure 3.1.2.7: Relationship between removing knots and diameter          | 56 |
| Figure 3.1.2.8: Detail discretion of time consumption for scraping        | 57 |

|   |    |
|---|----|
| Figure 3.1.2.9: Relationship between scraping and diameter                      | 58 |
| Figure 3.1.2.10: Detail description of time consumption for rubbing             | 59 |
| Figure 3.1.2.11: Relationship between rubbing and diameter                      | 60 |
| Figure 3.1.2.12: Detail description of time consumption for peeling             | 61 |
| Figure 3.1.2.13: Relationship between peeling and diameter                      | 62 |
| Figure 3.1.2.14: Comparison each processing steps among different stations      | 63 |
| Figure 3.1.2.15: Time distribution among different processing steps             | 63 |
| Figure 3.1.2.16 Summarization of mean time                                      | 64 |
| Figure 3.1.3.1: Associated difficulties of (RUWEKA-CG)                          | 68 |
| Figure 3.1.4.1: Getting samples and data collection                             | 70 |
| Figure 3.1.4.2: Frequency distribution of large end diameter in Galle district  | 72 |
| Figure 3.1.4.3: Frequency distribution of large end diameter in Matara district | 73 |
| Figure 3.1.4.4: comparison of mean diameter in different districts              | 73 |
| Figure 3.2.1.1: Rubbing devices (RUWEKA-CG)                                     | 76 |
| Figure 3.2.1.2: Components of the rubbing device (RUWEKA-CG)                    | 77 |
| Figure 3.2.1.3: Accumulative frequency distribution in Matara and Galle         | 79 |
| Figure 3.2.1.4: Accumulative frequency distribution in Galle                    | 79 |
| Figure 3.2.1.5: A. Rubbing machine (RUWEKA-CG) B. New machine                   | 84 |
| Figure 3.2.1.6: Time taken for both machines over the stick diameter            | 85 |
| Figure 3.2.2.1: Component of the Polly-cam mechanism                            | 88 |
| Figure3.2.2.2: Function of the Polly-cam mechanism                              | 89 |
| Figure 3.2.2.3: Insertion of cinnamon stick with Polly-cam mechanism            | 89 |
| Figure 3.2.2.4: Drawing 1   | 90 |
| Figure 3.2.2.5: Drawing 2   | 91 |
| Figure 3.2.2.5 Time variation of inserting sticks                               | 92 |
| Figure 3.2.2.6 Box plot for variation of time in insertion process              | 93 |

|   |    |
