LIST OF TABLES	VIII
LIST OF FIGURES	X
CHAPTER 1 - INTRODUCTION	1
CHAPTER 2 - LITERATURE REVIEW	12
2.1 Introduction	12
2.2. Objectives of the breeding programs in rice	12
2.2.1. Breeding objectives in Sri Lanka	13
2.2.1.1. Main objectives	13
2.2.1.2. Achievements	14
2.2.1.3. Use of Rice Germplasm	15
2.2.2. International Objectives	15
2.2.2.1. Objectives of Rice Experiment Station	15
2.2.2.1.1. Grain quality	16
2.2.2.1.2. Disease resistance	16
2.2.2.1.3. Yield	17
2.2.2.1.4. Cold tolerance	17
2.2.2.1.5. Early maturity	18

2.2.2.1.6. Short stature	18
2.2.2.1.7. Seedling vigor	18
2.2.2.2. General Rice Research Objectives of Rice Experiment Station	18
2.2.2.2.1. Areas and Priorities for Rice Breeding Research	19
2.2.2.2.2 Specific Rice Breeding Priorities by Grain Type, Market Class, and Special Use	19
2.2.2.3. Objectives of Rice Research Unit	20
2.2.2.3.1. Project objectives	21
2.2.2.3.2. Recent accomplishments	22
2.3. Types of rice	23
2.3.1. Grain Shape	24
2.3.1.1. Long Grain	24
2.3.1.2 Medium Grain	24
2.3.1.3 Short Grain	25
2.3.2 Specialty Rice	25
2.3.2.1 Arborio	25
2.3.2.2 Basmati-Type	25
2.3.2.3. Della or Dellmont Quality	26
2.3.2.4. Japanese Premium Quality	26
2.3.2.5 Jasmine-Type	26

2.3.3. Superior Processing Quality (Rexmont or Dixibelle Quality)	26
2.3.3.1 Toro-Type	27
2.3.3.2. Waxy (glutinous, sweet or sticky)	27
2.3.3.3. Wild Rice	27
2.4. Morphological characters of rice	28
2.4.1. Plant growth characters	28
2.4.1.1. Upper leaves, Leaf area and leaf orientation	28
2.4.1.1.1. Canopy structure and leaf orientation	29
2.4.1.1.1.2. Source and sink	30
2.4.1.1.1.3. Disrupting acclimation in lower leaves	30
2.4.1.1.2 Leaf area	32
2.4.1.2 Plant height	32
2.4.1.3. Number of tillers	32
2.4.2. Yield characters	34
2.4.2.1. Panicle characters	34
2.4.2.2. Number of spicklets/ panicle	34
2.4.2.3. Empty grains	34
2.4.3. Grain characters	35
2.4.3.1. Aroma	35
2.4.3.2. Grain Shape (Length, Width and L/W Ratio)	35
2.4.3.3. Specific grain properties/ kernel Composition	36
2.4.3.4. Cooking and eating quality	37
2.4.3.4.1. Kernel elongation	38
2.4.3.4.2. Expansion ratio	39

2.5. Relationship between morphology, yield and grain quality characters in rice	39
2.5.1. Path analysis	41
CHAPTER 3 - MATERIALS AND METHODS	42
3.1. Field Experiments	42
3.1.1. Plant height	43
3.1.2. Panicle number	43
3.1.3. Panicle length	43
3.1.4. Leaf angle	43
3.1.5. Flag leaf angle	44
3.1.6. Leaf area	44
3.1.7. Grain yield	44
3.1.8. Grain quality (aroma)	44
3.1.9. Kernel length and breadth	45
3.1.10. Kernel L/B ratio	45
3.1.11. Kernel length and breadth after cooking	46
3.1.12. Linear elongation ratio (LER)	45
3.1.13. Breadthwise expansion ratio (BER)	45
3.1.14. Elongation index (EI)	46
3.2. Statistical Analysis of the experimental data	46
3.3 Economic analysis	47
CHAPTER 4 -RESULTS AND DISCUSSION	48
4.1. Selection of aromatic rice lines to be used in breeding programs	48
4.1.1. Yield and growth performance of some aromatic rice breeding lines	48

4.1.2. Evaluation of selected aromatic rice breeding lines of two <i>Maha</i> seasons	51
4.1.3 Evaluation of selected aromatic rice breeding lines of two <i>Yala</i> seasons	53
4.1.4. Evaluation of selected aromatic rice breeding lines of combined four seasons	55
4.1.5 Correlations among characters of 1998/99 <i>Maha</i> season	58
4.1.6 Correlation of pooled data for <i>Maha</i> seasons (1998/99 and 1999/200	59
4. 1.7 Correlation of pooled data for <i>Yala</i> seasons (1999 and 2000)	60
4.1.8 Correlation analysis of pooled data for four seasons	61
4. 2. Path co-efficient analysis and genotypic and phenotypic correlations	64
4.2.1. Grain yield vs. panicle number	67
4.2.2. Grain yield vs. panicle length	67
4.2.3. Grain yield vs. leaf angle	68
4.2.4. Grain yield vs. flag leaf angle	68
4.2.5 Grain yield vs. leaf area	68
4.2.6. Grain yield vs. flag leaf area	68
4.3. Yield stability testing over locations	69
4.4. Cooking quality and kernel (hulled) characteristics	73
4.5. Economic analysis	76
 CHAPTER 5 - CONCLUSION	 77
 CHAPTER 6 - REFERENCES	 79

## LIST OF TABLES

	<b>PAGE</b>
Table 3.1: Origin of the mutant lines used in preliminary yield test	43
Table 4.1: Growth characteristics Yield and Aroma of the materials tested in 1998/99 <i>Maha</i>	48
Table 4.2: Growth and yield characteristics of selected rice cultivars and breeding lines tested in the two seasons of <i>Maha</i> (1998/99 <i>Maha</i> and 1999/2000 <i>Maha</i> )	51
Table 4.3 : Yield and growth characteristics of selected aromatic breeding lines and non- aromatic control varieties in two seasons of <i>Yala</i> (1999/2000)	54
Table 4.4: Mean values of all seasons	56
Table 4.5: Coefficients of correlation of yield and other important characters (1998/99 <i>Maha</i> season)	58
Table 4.6: Coefficients of correlation of yield and other important characters for pooled data of two <i>Maha</i> seasons (1998/99 and 1999/2000)	60
Table 4.7: Coefficients of correlation of yield and other important characters at the two seasons of <i>Yala</i> (1999/2000 and 2000/2001)	61
Table 4.8: Coefficients of correlation of yield and other important characters for all the seasons	62
Table 4. 9: Co-efficients of genotypic and phenotypic correlation of yield and other important characters	65

Table 4.10: Path analysis showing direct (underlined> and indirect effect of plant characters on yield	66
Table 4.11: Mean yield of varieties tested at five locations	69
Table 4.12: Kernel dimensions of aromatic lines	73
Table 4.13: Prices of 2003 and income could have been obtained accordingly	76
Table 4.14: Average Prices of aromatic rice in Sri Lanka.	76

## LIST OF FIGURES

	<b>PAGE</b>
Figure 4.1: Yields of tested varieties at different locations	70
Figure 4.2: Yields of tested varieties across different locations	71
Figure 4.3: Mean and Root Error mean Squares (REMS) of variety yields	71
Figure 4.4: Flag leaf angle of varieties across different locations	72
Figure 4.5: Flag leaf area of varieties across different locations	72
Figure 4.6: Grain length and breadth of the tested aromatic lines compared to the standards	76
