Abstract	x
List of References	xii
Appendix	xxxiii
Chapter 1: General Introduction	
1.1. Mangroves and its environment	01
1.2. Importance of mangroves	06
1.3. Impacts on mangrove ecosystem	08
1.4. Sri Lankan scenario	12
1.5. Objectives of the present study	13
Chapter 2: Community structure of mangrove forests of Rekawa and Kahandamodara lagoons: a study of the present status and a review.	
2.1. Introduction	15
2.2. Objectives	17
2.3. Materials and methods	18
2.3.1. Sampling and analysis	19
2.3.1.1. Floristic factors	19
2.3.1.2. Edaphic factors	23
2.3.1.3. Statistical analysis	27
2.4. Results	27
2.4.1. Rekawa lagoon	27
2.4.1.1. Species composition and their assemblages	27
2.4.1.2. Statistical analysis	33
2.4.1.3. Floristic zonation	35
2.4.2. Kahandamodara	46
2.4.2.1. Species composition and their assemblages	46
2.4.2.2. Statistical analysis	50
2.4.2.3. Zonation at Kahandamodara	50
2.5. Discussion	59
Chapter 3: Changes of the mangrove cover from 1956 – 1994 in Rekawa and Kahandamodara lagoons, a review with help of the aerial photographs.	
3.1. Introduction	69
3.2. Objectives of the study	72
3.3. Material and methods	72
3.3.1. Remote Sensing and Ground Surveys	73
3.3.2. Preparation of vegetation maps	75
3.4. Results	76

3.4.1.	Present status of the mangrove cover	76
3.4.2.	Changes in the mangrove cover of Rekawa	77
3.4.3.	Changes in the mangrove cover of Kahandaramodara	80
3.5.	Discussion	84
Chapter 4:	A study of socio-economic status of dwellers around Rekawa and Kahandamodara lagoons with the community perception of the multiple uses of mangroves.	
4.1.	Introduction	91
4.2.	Objectives	94
4.3.	Materials and Methods	95
4.4.	Results	98
4.4.1.	Some socio economic aspects in GN divisions surrounding lagoons	98
4.4.2.	Some socio economic aspects of the sample studied	98
4.4.3.	Multiple uses of mangroves	104
4.4.4.	Social and institutional involvement in the management of mangroves	118
4.5.	Discussion	120
Chapter 5:	Final Discussion	129

List of Figures

Figure	Page No
Figure 1.1a. Map showing the distribution of per capita income of the world	10
Figure 1.1b. The distribution of world heritage sites including mangroves	10
Figure 1.1c. World population distribution	11
Figure 2.1. Map of Sri Lanka showing the two lagoons studied	18
Figure 2.2. The point centred Quarter Method. Four distances are measured from each point to the nearest trees in each of the quarters	20
Figure 2.3. Map of Rekawa lagoon showing the mangrove cover, distribution of different assemblages of mangroves and location of transects (based on aerial photograph of 1994)	28
Figure 2.4. Profile diagram of the vegetation along Transect RT ₂ with elevation of land and soil conditions	36
Figure 2.5a. Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 1, representing the mix mangroves with <i>C.tagal</i> patch in the seaward bank of the Rekawa lagoon	37
Figure 2.5b. Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 2, representing the <i>C.tagal</i> dominating patch in the seaward bank of the Rekawa lagoon	38
Figure 2.6. Profile diagram of the vegetation along Transect RT ₇ (Seaward bank) with elevation of land and soil conditions, Rekawa lagoon	40
Figure 2.7. Number of individuals per segment (25 m ² /trees), and variations of some edaphic factors along the transect 5, representing the seaward bank of the Rekawa lagoon	41
Figure 2.8. Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 6, representing the <i>E. agallocha</i> dominated area in the landward bank of the Rekawa Lagoon	42
Figure 2.9. Profile diagram of the vegetation along Transect RT ₄ (landward shore) with elevation of land and soil conditions	44
Figure 2.10. Number of individuals per segment (25 m ² /trees), and variations of some edaphic factors along the transect 4, representing the mix mangroves with out <i>C. tagal</i> patch in the seaward bank of the Rekawa lagoon	45

Figure 2.11.	Map of Kahandamodara lagoon showing the mangrove cover, distribution of different assemblages of mangroves and location of transects	48
Figure 2.12.	Profile diagram of the vegetation along Transect KT ₂ with elevation of land and soil conditions	52
Figure 2.13.	Profile diagram of the vegetation along Transect KT ₅ with elevation of land and soil conditions	53
Figure 2.14.	Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 1, representing the seaward bank of the Khandamodara lagoon	54
Figure 2.15.	Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 2, representing the mangrove vegetation of the Khandamodara lagoon	55
Figure 2.16.	Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 4, representing the mangrove vegetation of the Khandamodara lagoon	56
Figure 2.17.	Number of individuals per segment (5 x 5 m ² /trees), and variations of some edaphic factors along the transect 3, representing the mangrove vegetation of the Khandamodara lagoon	57
Figure 3.1.	Map of Sri Lanka showing the two lagoons studied. A subset of each lagoon is included separately	75
Figure 3.2.	Map of Rekawa lagoon showing the mangrove cover in 1956	79
Figure 3.3.	Map of Rekawa lagoon showing the mangrove cover in 1994	79
Figure 3.4.	Map of Rekawa lagoon showing the changes of the mangrove cover, taken place during the period from 1956 to 1994 and the boundary of two geographical zones	80
Figure 3.5.	The Distribution of mangrove areas and other land uses at Kahandamodara lagoon based on the air photo of 1956	81
Figure 3.6.	The distribution of mangrove vegetation and other land uses at kahandamodara lagoon based on the aerial photographs taken in 1994	82
Figure 3.7.	The changes of the mangrove cover and other land uses of Kahandamodara lagoon from 1956 to 1994	83
Figure 3.8.	The Map showing Geographical and Hydrographical conditions with indication the main irrigation canals of the study area	87
Figure 3.9.	Runoff Change due to waterwork infrastructure	89

Figure 4.1.	Map showing the location of Rekawa and Kahandamodara lagoons and the GN Divisions surrounding there	96
Figure 4.2.	Age group distribution of members in respondent's families in visited households around Kahandamodara and Rekawa lagoons	99
Figure 4.3.	Main sources of revenues of dwellers in study areas, surrounding Kahandamodara and Rekawa lagoons	101
Figure 4.4.	Level of monthly income of respondents in the study area surrounding Kahandamodara and Rekawa	101
Figure 4.5.	Partition of respondents in Rekawa and Kahandamodara areas, based on their source of firewood	107
Figure 4.6.	The utilization of mangroves and mangrove associates as medicinal plants among respondents in Kahandamodara and Rekawa area	114

List of Tables

Table		Page No
Table 1.1.	Species composition of the mangrove flora in Sri Lanka	04
Table 1.2.	Products of mangrove ecosystems	08
Table 2.1.	Computation of relative density, relative dominance, relative frequency and important values of true mangroves recorded in each transect of Rekawa and calculated from PCQM data	29
Table 2.2.	Values derived from multiple regression analysis for association between soil factors and IVIs of species in Rekawa lagoon	34
Table 2.3.	Computation of relative density, relative dominance, relative frequency and important values of true mangroves recorded in each transect of Kahandamodara and calculated from PCQM data	47
Table 2.4.	Values derived from multiple regression analysis for association between soil factors and IVIs of species in Kahandamodara lagoon	50
Table 2.5.	Species composition of the mangroves and mangrove associates recorded from Rekawa and Kahandamodara lagoon	58
Table 2.6.	Species composition of Rekawa and Kahandamodara mangrove vegetations as given by different authors	64
Table 2.7a.	Species composition of mangroves and mangrove associates encountered in Rekawa lagoon with their I.V ranks	67
Table 2.7.b.	Species composition of mangroves and mangrove associates encountered in Kahandamodara lagoon with the relevant I.V. ranks	68
Table 3.1.	The key used to identify different assemblages/stand types of mangrove species in aerial photographs of Rekawa and Kahandamodara lagoons	74
Table 3.2.	Extent of aerial coverage of the total mangrove area of each lagoon in 1956 and 1994 and the the net change of the mangrove cover	77
Table 3.3.	Extent of the two zones of the mangrove cover of Rekawa, showing the changes over the 38 year period from 1956 to 1994	78
Table 3.4.	'Assemblage vice' partitioning of changes of the mangrove cover of Rekawa lagoon over the 38 year period from 1956 and 1994	80
Table 3.5.	'Assemblage vice' partitioning of changes of the mangrove cover of Kahandamodara lagoon over the 38 year period from 1956 and 1994	83

Table 4.1.	Educational levels of the people in the surrounding villages of Rekawa and Kahandamodara Lagoons	98
Table 4.2.	Number of households visited in each GN division to collect information in the socio economic survey	99
Table 4.3.	Housing conditions in the study area	100
Table 4.4.	The main fishing techniques practised in Rekawa lagoon	103
Table 4.5.	Community perception of major categories of economic uses of mangrove plants in Rekawa and Kahandamodara as revealed by respondents	104
Table 4.6.	Economic uses of individual species of mangroves and some common associates in Rekawa and Kahandamodara	106
Table 4.7a.	The order of respondent's preference for different species of mangroves to use as firewood. I. Rekawa lagoon	107
Table 4.7b.	The order of respondent's preference for different species of mangroves to use as firewood. II Kahandamodara lagoon	107
Table 4.8.	Common uses on mangroves and mangrove associates in folk and Arurvedic medicine	115
Table 4.9.	Number of tourists visited over the last three years to the BOI approved hotels, which are located near by Rekawa and Kahandamodara lagoon	116

List of Plates

Plate		Page No
Plate 4.1.	Frame of a roof made with <i>B. sexangula</i> poles and thatched with <i>Nypa</i> leaves	109
Plate 4.2.	Wattle and daub house with a frame made of mangrove posts with mangrove logs and filled with mud	109
Plate 4.3.	A fence made up of mangrove poles	109
Plate 4.4.	Large terrain covered by <i>A. aureum</i> in Kahandamodra	112
Plate 4.5.	An animal cage, constructed with <i>L. racemosa</i> poles	113
Plates 4.6.	Some uses of <i>Nypa</i> leaves	115
Plate 4.7.	Some uses and misuses of mangroves in tourism	117
Plate 4.8.	Wood of <i>Rhizophora</i> and <i>Bruguiera</i> trees extracted from Rekawa mangrove forest is transporting through Rekawa lagoon using a boat, that is normally used in lagoon fishery	127
