CHAPTER 1 - INTRODUCTION AND REVIEW OF LITERATURE

1.1 Use of plants in medicine 2
  1.1.1 Ayurveda 3
  1.1.2 Ayurveda and liver disease 4
  1.1.3 Allopathic medicine and liver disease 5
    1.1.3.1 Biochemical functions of the liver 5
    1.1.3.2 Classification of liver disease 7
    1.1.3.3 Assessment of liver damage 8
    1.1.3.4 Chemically induced hepatotoxicity 9
      1.1.3.4.1 Biotransformation of xenobiotics 9
      1.1.3.4.2 Hepatotoxicity 11
      1.1.3.4.3 Chemicals used in the present study 13
        1.1.3.4.3.1 Carbon tetrachloride induced hepatotoxicity 13
        1.1.3.4.3.2 Paracetamol induced hepatotoxicity 17
1.1.4 Medicinal plants used in Sri Lanka to treat liver diseases 21
1.1.5 Plants with experimentally confirmed hepatoprotective activity 25
1.1.6 Active principles isolated as hepatoprotective agents 28

1.2 Role of antioxidants in liver disease 30
1.2.1 Introduction 30
1.2.2 Reactive oxygen and mechanisms of liver injury 31
1.2.3 Endogenous enzymatic defense mechanisms 32
1.2.4 Endogenous non-enzymatic defense mechanisms 33
1.2.5 Antioxidants in paracetamol induced liver injury 34
1.2.6 Plants with experimentally confirmed antioxidative activity 35

1.3 Objectives of the study 38

1.4 Botanical features and medicinal uses of medicinal plants under study 39
1.4.1 Asteracantha longifolia 39
1.4.2 Asparagus falcatus 40
1.4.3 Epaltes divaricata 41
1.4.4 Vetiveria zizanioides 42
1.4.5 Corriandrum sativum 43

CHAPTER 2 - MATERIALS AND METHODS 44
2.1 General 45
2.2 Experimental model 45
2.3 Preparation of plant extracts 45
2.4 Dosage and administration of drugs
2.5 Induction of liver damage
2.6 Collection of blood for enzyme assays
2.7 Collection of liver tissue
2.8 Preparation of the cytosolic fraction
2.9 Estimation of serum alanine aminotransferase activity (E.C.2.6.1.2)
2.10 Estimation of serum aspartate aminotransferase activity (E.C.2.6.1.1)
2.11 Estimation of serum alkaline phosphatase activity (E.C.3.1.3.1)
2.12 Estimation of liver reduced glutathione concentration
2.13 Estimation of total proteins
2.14 Estimation of lipid peroxidation
2.15 Estimation of glutathione reductase activity (E.C.1.6.4.2)
2.16 Estimation of glutathione peroxidase activity (E.C.1.11.1.9)
2.17 Estimation of glutathione-S-transferase activity (E.C.2.5.1.18)
2.18 Estimation of haemoglobin concentration
2.19 Estimation of red blood cell count
2.20 Estimation of white blood cell count
2.21 Estimation of the packed cell volume
2.22 Histopathological assessment of liver damage
2.23 Statistical analysis
CHAPTER 3 – A PRELIMINARY INVESTIGATION OF THE
HEPATOPROTECTIVE EFFECT OF PLANT EXTRACTS

3.1 Introduction

3.2 Experiments

3.2.1 Effects of plant extracts on carbon tetrachloride induced hepatocellular damage

3.2.2 Effects of plant extracts on paracetamol induced hepatocellular damage in comparison with N-acetyl cysteine

3.3 Results

3.4 Conclusion

CHAPTER 4 – ANTIOXIDATIVE EFFECT OF PLANT EXTRACTS
PROTECTIVE AGAINST CHEMICALLY INDUCED HEPATOTOXICITY

4.1 Introduction

4.2 Experiments

4.2.1 Effects of plant extracts on CCl₄ mediated changes in antioxidant status of the liver

4.2.2 Effects of plant extracts on paracetamol mediated changes in antioxidant status of the liver

4.3 Results

4.4 Conclusion

CHAPTER 5 – STUDIES ON THE TOXICITY OF PLANT EXTRACTS
5.1 Introduction 132
5.2 Experiments 133
  5.2.1 Effects of plant extracts on liver enzyme activities 133
  5.2.2 Effects of plant extracts on various body organs 133
  5.2.3 Effects of plant extracts on haematological parameters 133
  5.2.4 General observations 134
5.3 Results 134
5.4 Conclusion 143

CHAPTER 6 – DISCUSSION 144
