ACKNOWLEDGEMENTS	i-iii
ABSTRACT	iv-v
LIST OF CONTENTS	vi-x
LIST OF TABLES	xi-xii
LIST OF FIGURES	xiii-xvi
CHAPTER 1 – INTRODUCTION AND REVIEW OF LITERATURE	
1.1 Use of plants in medicine	2
1.1.1 Ayurveda	3
1.1.2 Ayurveda and liver disease	4
1.1.3 Allopathic medicine and liver disease	5
1.1.3.1 Biochemical functions of the liver	5
1.1.3.2 Classification of liver disease	7
1.1.3.3 Assessment of liver damage	8
1.1.3.4 Chemically induced hepatotoxicity	9
1.1.3.4.1 Biotransformation of xenobiotics	9
1.1.3.4.2 Hepatotoxicity	11
1.1.3.4.3 Chemicals used in the present study	13
1.1.3.4.3.1 Carbon tetrachloride induced hepatotoxicity	13
1.1.3.4.3.2 Paracetamol induced hepatotoxicity	17

1.1.4	Medicinal plants used in Sri Lanka to treat liver diseases	21
1.1.5	Plants with experimentally confirmed hepatoprotective activity	25
1.1.6	Active principles isolated as hepatoprotective agents	28
1.2	Role of antioxidants in liver disease	30
1.2.1	Introduction	30
1.2.2	Reactive oxygen and mechanisms of liver injury	31
1.2.3	Endogenous enzymatic defense mechanisms	32
1.2.4	Endogenous non-enzymatic defense mechanisms	33
1.2.5	Antioxidants in paracetamol induced liver injury	34
1.2.6	Plants with experimentally confirmed antioxidative activity	35
1.3	Objectives of the study	38
1.4	Botanical features and medicinal uses of medicinal plants under study	39
1.4.1	<i>Asteracantha longifolia</i>	39
1.4.2	<i>Asparagus falcatus</i>	40
1.4.3	<i>Epaltes divaricata</i>	41
1.4.4	<i>Vetiveria zizanioides</i>	42
1.4.5	<i>Corriandrum sativum</i>	43
CHAPTER 2 – MATERIALS AND METHODS		44
2.1	General	45
2.2	Experimental model	45
2.3	Preparation of plant extracts	45

2.4	Dosage and administration of drugs	47
2.5	Induction of liver damage	47
2.6	Collection of blood for enzyme assays	47
2.7	Collection of liver tissue	47
2.8	Preparation of the cytosolic fraction	48
2.9	Estimation of serum alanine aminotransferase activity (E.C.2.6.1.2)	48
2.10	Estimation of serum aspartate aminotransferase activity (E.C.2.6.1.1)	50
2.11	Estimation of serum alkaline phosphatase activity (E.C.3.1.3.1)	52
2.12	Estimation of liver reduced glutathione concentration	53
2.13	Estimation of total proteins	57
2.14	Estimation of lipid peroxidation	60
2.15	Estimation of glutathione reductase activity (E.C.1.6.4.2)	62
2.16	Estimation of glutathione peroxidase activity (E.C.1.11.1.9)	63
2.17	Estimation of glutathione-S-transferase activity (E.C.2.5.1.18)	65
2.18	Estimation of haemoglobin concentration	66
2.19	Estimation of red blood cell count	70
2.20	Estimation of white blood cell count	72
2.21	Estimation of the packed cell volume	74
2.22	Histopathological assessment of liver damage	75
2.23	Statistical analysis	78

CHAPTER 3 – A PRELIMINARY INVESTIGATION OF THE		
HEPATOPROTECTIVE EFFECT OF PLANT EXTRACTS		79
3.1	Introduction	80
3.2	Experiments	82
3.2.1	Effects of plant extracts on carbon tetrachloride induced hepatocellular damage	82
3.2.2	Effects of plant extracts on paracetamol induced hepatocellular damage in comparison with N-acetyl cysteine	83
3.3	Results	84
3.4	Conclusion	111
CHAPTER 4 – ANTIOXIDATIVE EFFECT OF PLANT EXTRACTS		
PROTECTIVE AGAINST CHEMICALLY INDUCED HEPATOTOXICITY		112
4.1	Introduction	113
4.2	Experiments	114
4.2.1	Effects of plant extracts on CCl ₄ mediated changes in antioxidant status of the liver	114
4.2.2	Effects of plant extracts on paracetamol mediated changes in antioxidant status of the liver	115
4.3	Results	116
4.4	Conclusion	130
CHAPTER 5 – STUDIES ON THE TOXICITY OF PLANT EXTRACTS		131

5.1	Introduction	132
5.2	Experiments	133
5.2.1	Effects of plant extracts on liver enzyme activities	133
5.2.2	Effects of plant extracts on various body organs	133
5.2.3	Effects of plant extracts on haematological parameters	133
5.2.4	General observations	134
5.3	Results	134
5.4	Conclusion	143
CHAPTER 6 – DISCUSSION		144

List of Tables

	Page No
Table 1: List of plants used in Sri Lanka to treat different types of liver disorders	21
Table 2: Plants with experimentally confirmed hepatoprotective activity (In vivo studies.)	25
Table 3: Plants with experimentally confirmed hepatoprotective activity (In vitro studies)	26
Table 4: Most commonly used hepatoprotective plants in herbal formulations	27
Table 5: Plants with proven antihepatotoxic activity and active principles isolated from them	28
Table 5A: Endogenous antioxidant enzymes	32
Table 6: Plants with experimentally confirmed antioxidant activity (In vivo studies)	36
Table 7: Plants with experimentally confirmed antioxidant activity (In vitro studies)	36
Table 8: Assay medium for GSH standard curve	55
Table 9: Assay medium for the preparation of standard curve for total protein estimation	59
Table 10: Assay medium for haemoglobin standard curve	67
Table 11: Effect of plant extracts on serum enzyme activities and liver	

	GSH against CCl ₄ induced hepatotoxicity	88
Table 12:	Effect of plant extracts on serum enzyme activities and liver	
	GSH against paracetamol induced hepatotoxicity	102
Table 13:	Effect of plant extracts on CCl ₄ mediated changes in antioxidant status of the liver	119
Table 14:	Effect of plant extracts on paracetamol mediated changes in antioxidant status of the liver	120
Table 15:	Effect of plant extracts on CCl ₄ mediated changes in lipid peroxidation of the liver	121
Table 16:	Effect of plant extracts on paracetamol mediated changes in lipid peroxidation of the liver	122
Table 17:	Effect of plant extracts on serum enzyme activities after the administration for one month	135
Table 18:	Effect of plant extracts on haematological parameters after the administration for one month	135
