

TABLE OF CONTENTS

| | |
|--|------|
| ACKNOWLEDGEMENT..... | i |
| DEDICATION..... | iii |
| LIST OF TABLES..... | iv |
| LIST OF FIGURES..... | viii |
| LIST OF SCHEMES..... | xvi |
| CHAPTER 1 | 1 |
| INTRODUCTION | 1 |
| 1.1 C-C Bond Activation of Hydrocarbon Molecules..... | 1 |
| 1.1.1 Stoichiometric C-C Bond Activation Reaction..... | 3 |
| 1.1.2 Catalytic C-C Bond Activation Reactions | 4 |
| 1.1.2.1 C-C Bond Activation of Strained Molecules..... | 4 |
| 1.1.2.2. C-C Activation of Unstrained Molecules | 7 |

| | |
|--|----|
| 1.1.2.3. Chelate Assisted C-C Bond Activation Reactions of Unstrained Molecules..... | 8 |
| 1.1.2.4 Alkene/Alkyne Insertion Reactions via C-C Bond Cleavage..... | 12 |
| 1.2. Catalytic C-N Bond Activation Reactions | 15 |
| 1.2.1 Heterogeneous Hydrodenitrogenation of Nitrogen Heterocycles | 15 |
| 1.2.1 Hydrodenitrogenation Reactions Catalyzed by Soluble Metal Complexes..... | 15 |
| 1.2.2. Catalytic Deaminative C-N Cleavage Reactions..... | 19 |
| 1.2.2.1 C-N Bond Cleavage of Allylic Amines..... | 20 |
| 1.2.2.2 C-N Cleavage of Arylamines..... | 23 |
| 1.2.2.3 C-N Cleavage of Secondary and Tertiary Amines..... | 24 |
| 1.2.2.4 Biochemical Deamination Reactions..... | 26 |
| CHAPTER 2: PART 1: Transition Metal Catalyzed C-O Bond Activation Reactions.... | 33 |
| 2.1 Transition Metal Catalyzed Hydrogenolysis of Carbonyl Compounds..... | 33 |
| 2.1.1 Classical Carbonyl Reduction Methods | 33 |
| 2.1.2 Wolff-Kishner Reduction..... | 33 |
| 2.1.2.1 Catalytic Modification to Wolff-Kishner Reduction..... | 34 |
| 2.1.3 Clemmensen Reduction..... | 36 |

| | |
|--|----|
| 2.1.4 Reduction of ketone/aldehydes using aluminum, silane etc..... | 37 |
| 2.1.5 Homogeneous Catalytic Reduction Methods | 38 |
| 2.1.6 Reductive Deoxygenation of Ester, Amide, and other Carbonyl Compounds | 40 |
| 2.1.7 Hydrogenolysis of C-O Bonds | 46 |
| 2.1.7.1 Hydrogenolysis of Aryl Ethers | 46 |
| CHAPTER 2: PART 2: Transition Metal Catalyzed Ether Synthesis | 57 |
| 2.2.1 Introduction | 57 |
| 2.2.2 Classical Methods | 58 |
| 2.2.2.1 O-Alkylation..... | 58 |
| 2.2.2.2 Mitsunobu Etherification | 58 |
| 2.2.2.3 Etherification by Using DialkylPhosphites | 59 |
| 2.2.3 Cross-coupling Reactions..... | 61 |
| 2.2.3.1 Ullman Reaction | 62 |
| 2.2.4 Catalytic Etherification Methods | 65 |
| 2.2.5 Etherification by [IrCl ₂ Cp*(NHC)] Catalyst | 68 |
| 2.2.6 dehydrative Etherification of Alcohols | 70 |
| 2.2.7 Additions to Unsaturated Bonds | 72 |

| | |
|---|-----|
| 2.2.7.1 Wacker-type Reaction | 72 |
| 2.2.7.2 Hydroetherification of Unactivated Aliphatic Alkenes | 74 |
| 2.2.8 Dehydrative Coupling of Alcohols by Sodium Bisulfite..... | 76 |
| 2.2.9 Reductive Etherification | 77 |
| CHAPTER 3: Synthesis and Mechanistic Studies of Deaminative Coupling Reactions of Amines with Alcohols..... | 84 |
| 3.0. Introduction | 84 |
| 3.1 Results and Discussion..... | 90 |
| 3.1.1 Synthesis and Mechanistic Studies of Deaminative Coupling Reactions of Amines..... | 90 |
| 3.1.2 Optimization Study..... | 93 |
| 3.1.2.1 Catalytic Survey..... | 93 |
| 3.1.2.2 Solvent and Temperature Effect Studies..... | 93 |
| 3.1.3 Reaction Scope | 96 |
| 3.1.4 Mechanistic Study | 103 |
| 3.1.4.1 H/D exchange experiment..... | 103 |
| 3.1.4.2 Hammett Study | 104 |
| 3.1.4.3 Carbon Isotope Effect Study..... | 106 |

| | |
|--|-----|
| 3.1.4.4 Proposed Mechanism | 108 |
| 3.2 Synthetic and Mechanistic Studies of Decarboxylative and Deaminative Coupling Reactions of Amino Acids with Ketones | 112 |
| 3.2.1 Optimization of Reaction Conditions | 113 |
| 3.2.1.1 Catalytic Survey | 113 |
| 3.2.1.2 Solvent and Temperature Effects | 115 |
| 3.2.1.3 Catalyst Loading | 116 |
| 3.2.2 Reaction Scope | 117 |
| 3.2.3 Mechanistic Studies | 124 |
| 3.2.3.3 H/D exchange Experiments | 124 |
| 3.2.3.4 ¹³ C-Kinetic Isotope Effect | 125 |
| 3.2.3.5 Hammett Study | 127 |
| 3.2.3.6 Formation of Intermediate Products | 128 |
| 3.2.4 Proposed Mechanism | 128 |
| 3.2.5 Conclusion: | 130 |
| CHAPTER 4: Synthetic and Mechanistic Studies of Reductive Deoxygenation and Hydrogenolysis of Aldehydes and Ketone and Hydrogenolysis of Alcohols | 133 |
| 4.0 Introduction | 133 |
| 4.1 Results and Discussion | 134 |

| | |
|---|-----|
| 4.2 Optimization studies..... | 137 |
| 4.2.1 Catalyst, Ligand and Solvent Screening..... | 137 |
| 4.1.1.1 Catalytic Loading and Solvent Effect..... | 139 |
| 4.3 Reaction Scope..... | 140 |
| 4.4 Mechanistic Studies | 145 |
| 4.4.1 Hammett Study..... | 145 |
| 4.4.2 Kinetic Isotope Effect..... | 147 |
| 4.4.3 Deuterium Isotope Effect..... | 148 |
| 4.4.4 Carbon Isotope Effect..... | 155 |
| 4.4.5 Deuterium Labeling Study..... | 157 |
| 4.4.6 Determination of Empirical Rate Law..... | 162 |
| 4.4.6.1 Catalyst Concentration Dependence..... | 162 |
| 4.4.6.2 Dependence of Substrate Concentration..... | 163 |
| 4.4.6.3 Effect of Hydrogen Pressure..... | 165 |
| 4.5 Isolation and Characterization of Catalytically Relevant Ruthenium Complexes..... | 167 |
| 4.5.1 Catalyst Concentration Dependence Study..... | 176 |
| 4.6 Determination of pKa of Ru-H complexes..... | 178 |

| | |
|--|-----|
| 4.7 Proposed Mechanism..... | 180 |
| 4.8 Conclusion..... | 187 |
| CHAPTER 5: Synthetic and Mechanistic Studies of Ruthenium Catalyzed Reductive Etherification of Carbonyl Compounds and Alcohols..... | 188 |
| 5.0 Introduction..... | 188 |
| 5.1 Result and Discussion..... | 190 |
| 5.1.1 Optimization Studies..... | 190 |
| 5.1.1.1 Catalyst Screening..... | 190 |
| 5.1.1.2 Solvent and Temperature Effects..... | 192 |
| 5.1.2 Optimization of Turnover Number (TON) and Turnover Frequency (TOF)..... | 193 |
| 5.2 Reaction Scope..... | 194 |
| 5.2.1 Reaction Scope of Synthesis of unsymmetrical Ether by Ruthenium Catalyzed Reductive Etherification of Carbonyl Compounds and Alcohols..... | 194 |
| 5.2.2 Reaction Scope of Synthesis of Unsymmetrical Ethers from the Dehydrative Coupling of Highly Functionalized Bioactive Alcohols..... | 199 |
| 5.3 Determination of X-ray Crystallography..... | 200 |
| 5.4 Mechanistic Studies..... | 201 |
| 5.4.1 Hammett Study..... | 201 |
| 5.4.2 Solvent Isotope Effect..... | 203 |

| | |
|--|-----|
| 5.4.3 H/D Exchange Experiment | 205 |
| 5.4.4 Carbon Isotope Effect | 209 |
| 5.4.5 Identification of catalytic active intermediates | 212 |
| 5.5 Proposed Mechanism | 216 |
| 5.6 Conclusion: | 218 |
| CHAPTER 6: EXPERIMENTAL SECTION..... | 219 |
| 6.0 General Information | 219 |
| 6.1. Synthesis and Mechanistic Studies of Deaminative Coupling Reactions of Amines with Alcohols | 220 |
| 6.1.1 General Procedure for the Coupling Reaction of an Amine with an Alcohol..... | 220 |
| 6.1.2 Synthesis of Ru catalysts | 220 |
| 6.1.3 Synthesis of $[(\eta^6\text{-C}_6\text{H}_6)\text{RuH}(\text{CO})(\text{PCy}_3)]^+\text{BF}_4^-$ (2)..... | 221 |
| 6.1.4 Catalyst Screening for the Alkylation of 2-Butanol with 3-methoxybenzylamine..... | 221 |
| 6.1.5 Deuterium Labeling Study..... | 222 |
| 6.1.6. Carbon Isotope Effect Study..... | 222 |
| 6.1.7 Hammett Study..... | 223 |
| 6.1.8 Characterization of Organic Products..... | 224 |

| | |
|--|-----|
| 6.2 Synthesis and Mechanistic studies of Decarboxylative and Deaminative Coupling Reactions of Amino Acids with Ketones..... | 238 |
| 6.2.1 Catalyst Screening for the Alkylation of 4-methoxyacetophenone with L-leucine..... | 238 |
| 6.2.2. General Procedure for the Coupling Reaction of an Amino Acid with a Ketone..... | 238 |
| 6.2.3. H/D Exchange Reaction of Acetophenone- <i>d</i> ₈ with (<i>S</i>)-Leucine. | 239 |
| 6.2.4 Carbon Isotope Effect Study..... | 239 |
| 6.2.5 . Hammett Study..... | 240 |
| 6.2.6 . Characterization Data of the Products..... | 241 |
| 6.3. Scope and Mechanistic Analysis for Chemoselective Hydrogenolysis of Carbonyl Compounds Catalyzed by a Cationic Ruthenium-Hydride Complex with Tunable Phenol Ligands..... | 257 |
| 6.3.1. Experimental Procedures..... | 257 |
| 6.3.2 Ligand Screening and Optimization Study..... | 258 |
| 6.3.2 Hammett Study..... | 260 |
| 6.3.3 Deuterium Isotope Effect Study..... | 260 |
| 6.3.4 Carbon Isotope Effect Study..... | 263 |
| 6.3.5 Deuterium Labeling Study..... | 265 |
| 6.3.6 Empirical Rate Measurements: Catalyst Concentration Dependence..... | 268 |

| | |
|--|-----|
| 6.3.7 Catalyst Dependence Study..... | 270 |
| 6.3.8 Ketone Substrate Dependence Study..... | 272 |
| 6.3.9 Hydrogen Pressure Dependence..... | 274 |
| 6.3.10 Isolation and Characterization of Catalytically Relevant Ruthenium Complexes..... | 277 |
| 6.3.11 X-Ray Crystallographic Determination of 8a , 8c , 8e , 10 and 11 | 280 |
| 6.3.12 Characterization Data of the Products..... | 286 |
| 6.3.13 X-Ray Data:..... | 301 |
| 6.4 Synthetic and Mechanistic Studies of Ruthenium Catalyzed Reductive Etherification of Carbonyl Compounds and Alcohols..... | 308 |
| 6.4.2 Experimental Procedures..... | 308 |
| 6.4.3 Catalyst Screening Study..... | 290 |
| 6.4.4 Determination of TON..... | 291 |
| 6.4.5 Hammett Study..... | 291 |
| 6.4.6 Solvent Isotope Effect Study..... | 292 |
| 6.4.7 H/D Exchange Reaction of 4-Methoxybenzaldehyde with 1-Butanol in D ₂ O..... | 294 |
| 6.4.8 Carbon Isotope Effect Study..... | 295 |
| 6.4.9 Generation and Synthesis of the Alcohol and Aqua Complexes 7 , 8 and 9 | 297 |

| | |
|---|-----|
| 6.4.10 X-Ray Crystallographic Determination of 3d, 3e, 3f, 9,10 and 11..... | 298 |
| 6.4.10 Characterization Data of the Products. | 303 |
| 6.4.11 X-Ray Data:..... | 320 |
| BIBLIOGRAPHY..... | 325 |

LIST OF TABLES

| | |
|---|------|
| Table 3.1: Catalyst Survey on the Reaction of Coupling Product 14 of 3-methoxybenzylamine with 2-butanol..... | 86. |
| Table 3.2: Solvent Effect on the Reaction of 3-Methoxybenzylamine and 2-Butanol..... | 88. |
| Table 3.3: Deaminative Coupling of Amines with Alcohol..... | 90. |
| Table 3.4: Deaminative Coupling of Secondary Amines and Biologically Active Compounds. | 93. |
| Table 3.5: Calculated Average ^{13}C KIE from Virgin (R_0) and Recovered (R) Samples of Octanophenone. | 99. |
| Table 3.6: Catalyst Screening for the Coupling of 4-methoxyacetophenone with L-leucine. | 105. |
| Table 3.7: Solvent Effect on the Reaction of Leucine with 4-Methoxyacetophenone..... | 106. |
| Table 3.8: Catalyst Loading Effect on the Reaction of Leucine with 4-Methoxyacetophenone..... | 108. |
| Table 3.9: Decarboxylative and Deaminative Coupling of α -Amino Acids with Ketones..... | 109. |
| Table 3.10: Decarboxylative and Deaminative Coupling of β -Amino Acids with Ketone..... | 112. |

| | |
|--|------|
| Table 3.11: Decarboxylative and Deaminative Coupling Reaction of Biologically Important Ketones and Peptides..... | 114. |
| Table 3.12: Average ^{13}C Integration of the Product 14k at High Conversion (R_0 ; 96 % conversion), at Low Conversion (R ; avg 18 % conversion) and the Calculated ^{13}C KIE..... | 116. |
| Table 4.1: Ligand Screening for the Hydrogenolysis Reaction of 4-Methoxyacetophenone..... | 127 |
| Table 4.2: Reaction Scope of Catalytic Hydrogenolysis of Aldehydes and Ketones..... | 130 |
| Table 4.3: Deoxygenation of Biological active Ketone/Aldehyde Compounds..... | 133 |
| Table 4.4: Deuterium Isotope Effect Study for the Reaction of 4-Methoxyacetophenone with H_2/D_2 with $p\text{-X-C}_6\text{H}_4\text{OH}$ as the Ligand..... | 140 |
| Table 4.5: Average ^{13}C Integration of the Product 6j-[c1] at High Conversion (Virgin, R_0 ; 96 % conversion), at Low Conversion (R ; avg 18 % conversion) and the Calculated ^{13}C KIE using 4-Methoxyphenol as the Ligand..... | 144 |
| Table 4.6: Average ^{13}C Integration of the Product 6j-[c2] at High Conversion (Virgin, R_0 ; 96 % conversion), at Low Conversion (R ; avg 18 % conversion) and the Calculated ^{13}C KIE using 4-Trifluoromethylphenol as the Ligand..... | 144 |
| Table 4.7: Selected Spectroscopic Data for Complexes 8a-g | 155 |
| Table 4.8: Selected Physical Parameters of Complexes 5, 8a and 8f | 157 |
| Table 4.9: Summary of Kinetic Parameters for the Hydrogenolysis of Aryl ketone Catalyzed by $5/p\text{-X-C}_6\text{H}_4\text{OH}$ ($\text{X} = \text{OMe}, \text{CF}_3$)..... | 167 |
| Table 5.1: Catalyst Survey for the Reaction of 4-Methoxybenzaldehyde with 1-Butanol ^a | 177 |

| | |
|---|-----|
| Table 5.2: Solvent Effect on the Reaction of 4-Methoxybenzaldehyde with 1-Butanol..... | 178 |
| Table 5.3: Synthesis of Unsymmetrical Ethers from the Dehydrative Coupling of Alcohols..... | 182 |
| Table 5.4: Synthesis of Unsymmetrical Ethers from the Reductive Coupling of Carbonyl Compounds with Alcohols..... | 185 |
| Table 5.5: Calculated Average ^{13}C KIE from Virgin (R_0) and Recovered (R) Samples of 2f | 195 |
| Table 6.1: Ligand Screening for the Hydrogenolysis Reaction of 4-Methoxyacetophenone..... | 242 |
| Table 6.2: Average ^{13}C Integration of the Product 6j at High Conversion (Virgin, R_0 ; 96% conversion), at Low Conversion (R ; avg 18% conversion) and the Calculated ^{13}C KIE using 4-OMeC ₆ H ₄ OH as the ligand..... | 247 |
| Table 6.3: Average ^{13}C Integration of the Product 6j at High Conversion (Virgin, R_0 ; 96% conversion), at Low Conversion (R ; avg 18% conversion) and the Calculated ^{13}C KIE using 4-CF ₃ -C ₆ H ₄ OH as the ligand..... | 247 |
| Table 6.4: Crystal Data and Structure Refinement for 8a | 282 |
| Table 6.5: Crystal Data and Structure Refinement for 8a' | 283 |
| Table 6.6: Crystal Data and Structure Refinement for 8c | 284 |
| Table 6.7: Crystal Data and Structure Refinement for 8e | 285 |
| Table 6.8: Crystal Data and Structure Refinement for 10 | 286 |
| Table 6.9: Crystal Data and Structure Refinement for 11 | 287 |
| Table 6.10: Crystal Data and Structure Refinement for 14 | 288 |

| | |

LIST OF SCHEMES

| | |
|---|----|
| Scheme 1.1: Microscopic Reversibility of C-C Bond Activation..... | 2 |
| Scheme 1.2: C-C Bond Activation of Propane by Cp*Rh(PMe ₃)(H) ₂ | 3 |
| Scheme 1.3: C-C Bond Activation of Pincer-Type Ligands..... | 3 |
| Scheme 1.4: C-C Bond Activation of Propane by (PPh ₃) ₃ RhCl..... | 5 |
| Scheme 1.5: Rh Catalyzed C-C Activation of Cyclobutanone. | 5 |
| Scheme 1.6: Proposed Mechanism of Pd Catalyzed Arylation of <i>tert</i> -cyclobutanol..... | 6 |
| Scheme 1.7: Ruthenium-Catalyzed Deallylation of Unstrained Homoallylic Alcohol. | 7 |
| Scheme 1.8: Proposed Mechanism for the α -C-C Bond Cleavage of 8-Quinolinyl Alkyl Ketone..... | 8 |
| Scheme 1.9: Proposed Mechanism Decarbonylative C-C Bond Activation of Oxazolidine..... | 9 |
| Scheme 1.10: Proposed Mechanism for Chelate Assisted C-C Bond Activation Catalyzed by (PPh) ₃ RhCl..... | 10 |
| Scheme 1.11: Proposed Mechanism for C-C Bond Cleavage of Secondary Benzyl Alcohol..... | 12 |
| Scheme 1.12: Postulated Mechanism for the Ni-Catalyzed Intermolecular Alkyne Insertion into Cyclobutanone. | 13 |
| Scheme 1.13: Proposed Mechanism for Denitrogenation of N-heterocycle by Ti Catalyst..... | 17 |

| | |
|--|----|
| Scheme 1.14: Allylic Isomerization Promoted by a Combination of Palladium and Protic Acid..... | 19 |
| Scheme 1.15: Plausible Reaction Mechanism Pd Catalyzed Allylic Alkylation..... | 20 |
| Scheme 1.16: Proposed Mechanism for Rh/Cu Catalyzed Anulation of Benzimide and Alkyne..... | 24 |
| Scheme 1.17: Proposed Repair Mechanism for AlkB-family Proteins..... | 27 |
| Scheme 1.18: Mechanism of Aspartate Deamination by Lyases..... | 30 |
| Scheme 2.1: Zinc Promoted Reduction of Ketone and Ozonolysis of Alkene | 35 |
| Scheme 2.2: Reduction of Carboxylic Acid into Alkane | 36 |
| Scheme 2.3: Mechanism of Ga(OTf) ₃ Catalyzed Reduction of Ketone by Silane. | 37 |
| Scheme 2.4: Proposed Mechanism for Ru Catalyzed Hydrogenolysis of Esters | 40 |
| Scheme 2.5: Proposed the Reaction Mechanism for the Zinc Catalyzed Amide..... | 42 |
| Scheme 2.6: C-O Cleavage of Aryl-OMe Ether by Rh..... | 44 |
| Scheme 2.7: Proposed Mechanism for the Hydrogenolysis of Aryl Ether Catalyzed By Ru Catalyst. | 47 |
| Scheme 2.8: Oxidation of Phenolic Ligand Model Compound with Vanadium Catalysts | 50 |
| Scheme 2.9: Tentative Mechanism for the Rhodium-Catalyzed Rearrangement of 2-(Aryloxy) Benzaldehydes to 2-Hydroxybenzophenones..... | 52 |
| Scheme 2.10: Mechanism of Etherification of Cholesterol, ROH= Cholesterol..... | 56 |

| | |
|--|-----|
| Scheme 2.11: Mechanism of Rhenium (I) Catalytic Etherification Cycle..... | 61 |
| Scheme 2.12: Mechanism of In (III) Catalyzed Deoxygenation of Esters..... | 63 |
| Scheme 2.13: Proposed Mechanism of Synthesis of Unsymmetrical Ether by Iridium Catalyst | 64 |
| Scheme 2.14: Working Mechanistic Hypothesis for Unsymmetrical Ether Formation... | 66 |
| Scheme 2.15: Proposed Mechanism for Ir Catalyzed Hydroetherification of Phenol and Alkene | 70 |
| Scheme 2.17: Proposed Simplified Catalytic Cycle with TESOTf as Active Catalyst.... | 74 |
| Scheme 2.18: Synthetic Raoute for the Synthesis of (-)-Exiguolide..... | 75 |
| Scheme 2.19: Proposed Mechanism for the Zn Catalyzed Etherification..... | 76 |
| Scheme 3.1: Pyridoxal Derivatives and Cu ²⁺ ion Catalyzed Oxidative Deamination of Amino Acids..... | 81 |
| Scheme 3.2: Synthesis of Cationic Ruthenium Hydride Complex 5 | 83 |
| Scheme 3.3: Generation of Cationic Ru-Alkenyl Species 9 | 100 |
| Scheme 3.4: Proposed Mechanism for Deaminative Coupling of Amines with Alcohol. | 102 |
| Scheme 3.5: Proposed Mechanism for the Decarboxylative and Deaminative Coupling of Amino Acids with Ketone..... | 119 |
| Scheme 4.1: Electronic Effect of Ru-H (8) Catalyzed H ₂ Activation | 142 |

| | |
|--|-----|
| Scheme 4.2: ^{13}C KIE data for the 6-Methoxy-1,2,3,4-tetrahydronaphthalene (A) for the in-situ Generated Catalyst 8a (B) for the in-situ Generated Catalyst 8f. | 143 |
| Scheme 4.3: Deuterium Incorporation pattern of 1-Ethyl-4-methoxybenzene Product when (a) 4-Methoxyacetophenone and 4-(Trifluoromethyl)phenol (b) 1-(4-Methoxyphenyl)ethanol and 4-(Trifluoromethyl)phenol (c) 4-Methoxyacetophenone and 4-Methoxyphenol (d) 1-(4-Methoxyphenyl)ethanol and 4-Methoxyphenol is used. . | 145 |
| Scheme 4.4: Keto Enol Tautomerization and Formation of Ru-enolate Complex | 148 |
| Scheme 4.5: Synthetic Routes for the Complex 9..... | 158 |
| Scheme 4.6: Possible Intermediates from the Reaction of Complex 10 with H_2 | 160 |
| Scheme 4.7: Synthetic Route for the Complex 14 | 162 |
| Scheme 4.8: Catalytic Cycle of Noyori Catalyst via a Concerted Six-membered Transition State..... | 166 |
| Scheme 4.9: Outer-sphere Mechanism for the Hydrogenation of Ketones to Alcohols..... | 167 |
| Scheme 4.10: Proposed Mechanism of Ruthenium Catalyzed Hydrogenolysis of 1-Phenethanol to Ethyl Benzene for the Catalyst 8a (X = OMe)..... | 168 |
| Scheme 4.11: Proposed Mechanism of Ruthenium Catalyzed Hydrogenolysis of 1-Phenethanol to Ethyl Benzene for the Catalyst 8f (X = CF_3)..... | 171 |
| Scheme 5.1: Synthesis of Complex 7, 8 and 9..... | 196 |
| Scheme 5.2: Proposed Mechanism for the Catalytic Reductive Coupling of Carbonyl Compound with Alcohols..... | 201 |
