CHAPTER 1	
1.1 INTRODUCTION	1
1.2 NATURAL PHOTOSYNTHESIS	3
1.3 FUNDAMENTAL ASPECTS OF PHOTOCHEMISTRY	6
1.3.1 Excitation of a molecule	6
1.3.2 The fate of the excited state	6
1.3.3 Thermal and photochemical reactions	7
1.4 MAIN INSIGHTS OF SEMICONDUCTOR APPLICATIONS IN CONVERTING SOLAR ENERGY	8
1.5 PHOTOCATALYTIC AND PHOTOSYNTHETIC REACTIONS	11
1.6 PHOTOGENERATION OF HYDROGEN	13
1.6.1 Photochemical splitting of water	15
1.6.1.1 The basic requirements of splitting of water	17
1.6.1.2 The general concept with regard to water cleavage	17
1.6.1.3 The key role of Pt in formation of hydrogen	20
1.6.1.4 The catalytic role of water oxidation at macrodispersed RuO ₂ surface	22
1.6.1.5 Components of the photochemical hydrogen generation systems	22
1.6.1.6 Components of Photochemical oxygen generation systems	24
1.6.1.7 Cyclic water Cleavage	27
1.6.2.1 Hydrogen sulfide as a hydrogen generation source	32
1.6.2.2 Photocatalytic cleavage of hydrogen sulfide on CdS.	33
1.6.3 Photocleavage of organic compounds to generate hydrogen	33
1.6.3.1 Molecular photocatalytic cleavage of organic compounds	34
1.6.3.2 Photocatalytic cleavage of organic compounds using semiconductors.	36
1.7 PHOTOREDUCTION OF CARBON DIOXIDE	38
1.8 PHOTOREDUCTION OF NITROGEN	39
1.9 PHOTOINDUCED REMOVAL OF CONTAMINANTS (ORGANIC AND METALLIC) IN WATER	40
CHAPTER 2	
2.1 PREPARATION OF CATALYSTS	41
2.2 IRRADIATION PROCEDURE	44
2.2.1 Apparatus	44

2.2.2	Procedure	45
2.2.3	Copper(II) chloride in aqueous solutions of ethanol	45
2.2.4	Copper sulphate in aqueous solutions of alcohols	46
2.2.5	Iron(III)chloride/Iron(II)sulphate/Iron(III) perchlorate or iron(III)sulphate in aqueous solutions of alcohols.	46
2.2.6	Tetrahydroxostannate(II) solution	47
2.2.7	Samarium(III) and Europium(III) Ions in aqueous solutions of alcohols.	47
2.2.8	Iron(III) phosphate/TiO ₂	48
2.3	ANALYTICAL METHODS	48
2.3.1	Determination of Fe ³⁺ ions by colorimetry	48
2.3.2	Calorimetric determination of [Fe ²⁺] by the O-phenanthroline	49
2.4	INSTRUMENTAL ANALYSIS	50
2.4.1	Spectrophotometric analysis	50
2.4.2	Gas chromatographic analysis	51
2.4.3	X-ray diffractometry	51
2.4.4	Determination of the flat band potential	52
2.4.5	Particle size analysis	53
2.5	DETERMINATION OF PHOTON FLUX OF LOW PRESSURE MERCURY LAMP	54
CHAPTER 3		
3.1	RESULTS AND DISCUSSION	63
3.1.1	Copper(II)chloride in aqueous solutions of ethanol	63
3.1.2	copper(II)sulphate in aqueous solutions alcohols`	65
3.1.3	Iron(III)chloride/Iron(II)sulphate iron(III)perchlorate or Iron(III)sulphate in aqueous solutions of alcohols.	73
3.1.4	Tetrahydroxostannate(II) solution	80
3.1.5	Samarium(III) and Europium(III) ions in aqueous solutions of alcohols	85
3.1.6	Iron(III)phosphate/TiO ₂ .	89
