

List of Figures

Figure	Page
1.1 Global distribution of malaria & problem areas	2
1.2 Major climatic zones of Sri Lanka	7
1.3 Provinces and administrative districts of Sri Lanka	21
1.4 Physical features & water resources of Hambantota district	23
1.5 Distribution of rainfall & climatic zones of Hambantota district	26
1.6 Major irrigation development schemes & colonization schemes of Hambantota district	30
1.7 Malaria incidence in the country and the Southern province	35
1.8 Malaria incidence in the Southern province , Hambantota district and Lunugamvehera DDHS area	35
1.9 G.N divisions of Lunugamvehera DDHS area	37
1.10 Lunugamvehera development scheme	41
2.1 Location of study hamlets in the Lunugamvehera development scheme	44
2.2 Detailed map of Hamlet 2RB	46
2.3 Detailed map of Hamlet 3RB	47
2.4 Rectangular shaped mosquito net	57
2.5 Method for determining the susceptibility or resistance of adult mosquitoes to insecticides	77
3.1 Malaria incidence in hamlet 2 1988-1991	94
3.2 Malaria incidence in hamlet 3 1988-1991	95
3.3 Malariometric indices in two hamlets 1988-1991	98
3.4 Outdoor prevalence of anopheline mosquitoes in two hamlets	99

3.5	Indoor prevalence of anophelines in two hamlets in 1991	100
3.6	Indoor prevalence of anopheline mosquitoes in malathion sprayed and unsprayed houses in two study hamlets in 1991	101
3.7	Indoor Prevalence of anophelines in Malathion Sprayed and Unsprayed houses in 1991	102
3.8	Indoor & Outdoor Man Biting Rate of anopheline Mosquitoes in 1991	103
3.9	Rainfall in Lunugamvehera 1988-1991	105
3.10	API, Rainfall and No. of rainy days 1988-1991	106
3.11	Malaria Incidence in Hamlet 2RB 1992-1994	109
3.12	Malaria Incidence in Hamlet 3 RB 1992 –1994	110
3.13	API and SPR in study hamlets 1992-1994	114
3.14	API of males and females in study hamlets 1992-1994	115
3.15	Malaria incidence in different age groups in study hamlets 1992-1994	116
3.16	Annual Parasite Incidence (API) by age groups in study hamlets during 1992-1994	119
3.17	Annual Parasite Incidence of different house construction types in two hamlets	120
3.18	Annual Parasite Incidences in different house construction types in study hamlets	122
3.19	Average outdoor prevalence of anophelines in study hamlets 1992-1993	127
3.20	Monthly outdoor prevalence of anophelines in study hamlets 1992-1993	128
3.21	Indoor prevalence of anophelines in study hamlets 1992 – 1993	129
3.22	Monthly indoor prevalence of anophelines in study hamlets 1992 – 1993	130
3.23	Man Biting Rate of anophelines in study hamlets 1992 –1993	131
3.24	Monthly Indoor Man Biting Rate of anophelines in study hamlets 1992 –1993	132

3.25	Monthly outdoor Man Biting Rate of anophelines in study hamlets 1992 –1993	133
3.26	Indoor prevalence of Semi gravid & Gravid <i>An.culicifacies</i> in two hamlets 1992-1993	136
3.27	Indoor prevalence of semi gravid & gravid <i>An.subpictus</i> in two hamlets 1992-1993	137
3.28	Species composition of anophelines in study hamlets 1992 - 1993	141
3.29	Annual Parasite Incidence and the Rainfall in study hamlets 1992-1994	147
3.30	Rainfall in Lunugamvehera 1992 – 1994	148
3.31	Indoor resting density of <i>An.culicifacies</i> and <i>An.subpictus</i> and the rainfall in hamlet 2 RB 1992-1993	149
3.32	Indoor resting density of <i>An.culicifacies</i> and <i>An.subpictus</i> and the rainfall the hamlet 3 RB 1992-1993	150
3.33	Water release along the right bank main canal of Lunugamvehera development scheme	152
3.34	Indoor resting density of <i>An.culicifacies</i> and <i>An.subpictus</i> and the no.of days water released	153

List of Tables

Table		Page
1.1	Characteristics of the major epidemiological types of malaria transmission	4
1.2	Principal rivers in Hambantota district by length, catchment area and run off	24
1.3	Land use of Hambantota district	28
1.4	Distribution of housing units in Hambantota district by principal material used for the construction of walls	31
1.5	Distribution of housing units in Hambantota district by principal material used for the construction of roof	32
1.6	Malaria incidence in Hambantota district – 1994	33
1.7	Malaria incidence in Sri Lanka, Southern province, Hambantota district and Lunugamvehera DDHS area.	34
2.1	Demographic characteristics of study area	48
3.1	Distribution of population by age	86
3.2	Distribution of population by sex	87
3.3	Distribution of population by house type	87
3.4	Distribution of adult population by occupation	87
3.5	Malaria incidence of hamlet 2RB1988-1991	91
3.6	Malaria incidence of hamlet 3RB1988-1991	91
3.7	Malariometric indices prior to intervention	96
3.8	Entomological characteristics of selected hamlets during 1991	97
3.9	Rainfall data recorded at Lunugamvehera Meteorology station 1988-1991	104
3.10	Indoor Residual spray coverage in 1991	107
3.11	Malaria incidence of hamlet 2RB 1992-1994	108

3.12	Malaria incidence of hamlet 3RB 1992-1994	111
3.13	Malriometric indices post-intervention 1992-1994	111
3.14	Malaria incidence by sex 1992-1994	112
3.15	Annual Parasite Incidences by sex 1992-1994	112
3.16	Malaria incidence by age 1992-1994	113
3.17	Annual Parasite Incidence by age groups 1992-1994	117
3.18	Annual Parasite Incidence in study hamlets by house type 1992-1994	118
3.19	Annual Parasite Incidence by house types	121
3.20	Malaria incidence rate and % reduction	123
3.21	Entomological characteristics of selected hamlets during 1992	124
3.22	Entomological characteristics of selected hamlets during 1993	125
3.23	Entomological characteristics of selected hamlets during 1992-1993	134
3.24	Indoor resting density (\pm SD) of gravid & semi gravid <i>An.culicifacies</i> in study hamlets during 1992-1993	135
3.25	Indoor resting density of gravid & semi gravid <i>An.subpictus</i> in study hamlets during 1992-1993	135
3.26	Pre and post intervention densities of all anophelines	138
3.27	Pre and post intervention densities of <i>An. culicifacies</i>	139
3.28	Pre and post intervention densities of <i>An. subpictus</i>	139
3.29	Species distribution of anopheline mosquitoes caught outdoors	140
3.30	Susceptibility status of anopheline mosquitoes 1992 –1993	142
3.31	Insecticide susceptibility status of anopheline vectors in Lunugamvehera DDHS area during 1992 – 1993	143
3.32	Insecticide susceptibility status of anopheline vectors in Lunugamvehera DDHS area during 1994	144

3.33	Bio assay test results in study hamlets 1992-1993	145
3.34	Rainfall data recorded at Lunugamvehera Meteorology station 1992 – 1994	146
3.35	Frequency of water release in the right bank main canal of Lunugamvehera development scheme	151
3.36	Residual insecticide (malathion) spray coverage in Hamlet 2 RB	154
3.37	Use of ITN in Hamlet 3 RB	155

List of Plates

Plate		Page
1	Lunugamvehera reservoir and the dam	39
2	Irrigation canals and the jungle around the hamlet	45
3	Paddy fields in the hamlet	45
4	Training of community health workers to improve the knowledge	50
5	Indoor residual spraying with malathion	55
6	Community participation for indoor residual spraying	55
7	Mosquito net given under the project	60
8	Insecticide impregnation of a net	60
9	Inquiring about the use of mosquito nets	61
10	Community participation for the impregnation of nets	61
11	Blood filming and blood film examination	64
12	Follow up of a fever case by a community health worker	64
13	Cattle baited net trap	67
14	Mosquito collection at dawn inside a net trap	67
15	Cattle baited hut trap	69
16	Mosquito collection at dawn inside a hut trap	69
17	Pyrethrum spraying inside a house to determine indoor resting prevalence	71
18	Collection of mosquitoes on a pyrethrum spray sheet	71
19	Human bait night collection	74
20	An insecticide susceptibility test	74
21	A bioassay test done on an insecticide sprayed surface of a house	82

22	A bioassay test done on an insecticide impregnated net	82
23	Participation of AMC officials for monthly meetings of CHWs	84
24	Poor quality houses distributed in a hamlet	88
25	A “poor” house	88
26	A “moderate” house	89
27	A “good ” house	89
28	A temporary hut built in a “chena”	92
29	Chena lands near by hamlets	92
30	Tree huts	93

List of Annexes

Annex		Page
1	Questionnaire for demographic survey	175
2	Questionnaire for KAP survey	176
3	Form prepared to select informal leaders	177
4	Daily spraying record	178
5	House hold card	179
6	Diagnosis card given for house holds	180
7	Rapid Giemsa staining method	181
8	Health 1069 form	182
9	Treatment regimen of malaria	183
10	Data form for CBNT and CBHT collections	184
11	Data form for pyrethrum spray sheet collections	185
12	Data form for human bait night collections	186
13	Data form for insecticide susceptibility tests	187
14	Data form for bioassay tests	188
