

CONTENTS

	P a g e
CHAPTER 1 THEORETICAL BACKGROUND	1
1.1 Introduction	1
1.2 Photoelectrochemical Cells	4
1.2.1 Electrochemical Photovoltaic Cells	5
1.2.2 Photoelectrosynthetic Cells	6
1.2.3 Photocatalytic Cells	6
1.2.4 Reaction mechanism at the semiconductor electrolyte interface	7
1.2.5 Power conversion efficiency of PECs	8
1.2.6 Advantages of PEC devices	9
1.3 Photocatalytic Reaction in Semiconductor Particulate Systems	10
1.3.1 Photodecomposition of water	12
1.3.2 Photoreduction of CO ₂	13
1.3.3 Photofixation of N ₂	14
 CHAPTER 2 SEMICONDUCTING AND PHOTOCATALYTIC PROPERTIES OF CUPROUS THIOCYANATE	 27
2.1 Introduction	27
2.2 Preparation of Materials	29

	P a g e
2.2.1 CuCNS Powder	29
2.2.2 CuCNS Single Crystals	29
2.2.3 CuCNS thin films	30
2.2.3.1 p-type CuCNS films	31
2.2.3.2 n-type CuCNS films	31
2.3 Spectroscopic Analysis	32
2.3.1 Atomic Absorption Spectroscopy	32
2.3.2 Infrared Spectroscopy	33
2.3.3 Diffuse Reflectance Spectra	33
2.4 Conductivity Measurements	33
2.4.1 Temperature Dependence	34
2.5 Identification of the type of conductivity	34
2.5.1 Photocurrent Method	35
2.5.2 Hall Measurements	35
2.6 Photoelectrochemical Cell Measurements	36
2.6.1 Photocurrent Measurements	36
2.6.2 Flat Band Potential Measurements	37
2.7 Photocatalytic Activity of CuCNS	38
2.7.1 Photodecomposition of H ₂ O	39
2.7.2 Photoreduction of CO ₂	39
2.7.3 Photoreduction of N ₂	39
2.8 Results and Discussion	40
CHAPTER 3 STABILITY OF CuCNS COATED PHOTOCATHODE IN AQUEOUS ELECTROLYTE	60
3.1 Introduction	60

	P a g e
3.2 Experimental	61
3.3 Results and Discussion	64
 CHAPTER 4 PHOTOCATALYTIC NITROGEN FIXATION ON SEMICONDUCTOR SURFACES	 71
4.1 Introduction	71
4.2 Experimental	75
4.2.1 Preparation of metal coated SrTiO ₃	 75
4.2.2 Preparation of hydrous ferric oxide	 76
4.2.3 Preparation of metal coated hydrous ferric oxide	 76
4.2.4 Preparation of Fe(III) co-precipitated with Al ³⁺ , Mo ⁶⁺ , Ni ²⁺ , Cu ²⁺ , Sn ²⁺ , Zr ⁴⁺ , Zn ²⁺ , Mg ²⁺ , Co ²⁺ and Mn ²⁺	 77
4.2.5 Co-precipitation of Fe(III) and Ti(IV) hydrous oxide	 77
4.2.6 Preparation of CuCNS coated Ag, Pt, Hg	 77
4.2.7 Preparation of hydrous cuprous oxide	 78
4.2.8 Preparation of cuprous chloride coated hydrous cuprous oxide	 78
4.3 Irradiation Procedure	79

4.4	Determination of ammonia by Indophenol blue method	81
4.5	Determination of nitrates and nitrites	83
4.6	Results and Discussion	84
4.6.1	Metal doped SrTiO ₃ system	84
4.6.2	Hydrous ferric oxide system	85
4.6.3	Coprecipitated system of Fe(III) and Ti(IV) hydrous oxide	88
4.6.4	Hydrous cuprous oxide	89
4.6.5	Cuprous chloride coated hydrous cuprous oxide	92
