Abstract	i
Acknowledgement	iv
List of tables	v
CHAPTER 1: INTRODUCTION	1
1.1 Demand for food	2
1.1.1 Population level and its structure	4
1.1.1.1 Population	4
1.1.1.2 Structure of population	5
1.1.2 Per capita income	5
1.1.3 Relative prices of commodities	7
1.1.4 Taste and preferences of consumers	8
1.2 Nutritional status	9
1.3 Problem statement	15
1.4 Objective of the study	18
1.5 Organization of the thesis	19
CHAPTER 2: LITERATURE REVIEW	21
2.1 Related studies in other countries	21
2.2 Related studies in Sri Lanka	26
CHAPTER 3: THEORETICAL CONCEPT	30
3.1 Axioms of choice	32
3.2 Derivation of demand equations	33
3.2.1 Utility maximization	33
3.2.2 Cost minimization	35

3.3	Slutsky equation: income and substitution effects	37
3.4	Separability and two stage budgeting	41
3.4.1	Utility tree	44
3.4.2	Utility tree hypothesis	44
3.4.3	Demand functions	45
3.4.3.1	Unconditional demand function	45
3.4.3.2	Conditional demand function	46
3.5	Elasticities	50
3.5.1	Price elasticity of demand	51
3.5.2	The income elasticity of demand	52
3.5.3	The cross price elasticity of demand	53
CHAPTER 4: METHODS AND EMPIRICAL MODELS		55
4.1	Data	55
4.2	Functional forms	57
4.2.1	Linear demand function	57
4.2.2	Double logarithmic demand function	58
4.2.3	The Indirect Addilog System	60
4.2.4	The Linear Expenditure System	61
4.2.5	The Almost Ideal Demand System	63
4.2.6	The Rotterdam model	64
4.3	Model	66
4.4	Food consumption pattern, empirical model and elasticities	70
4.4.1	Food consumption pattern	70
4.4.2	Empirical model	70
4.4.3	Elasticities from the Rotterdam model	72

CHAPTER 5: RESULTS AND DISCUSSION	74
5.1 Household size and income	74
5.2 Food consumption pattern	76
5.3 Intake of energy, total protein, minerals, and vitamins	88
5.4 Price and income elasticities	94
5.4.1 Starch food	95
5.4.2 Protein food	105
5.5 Policy implications	115
5.6 Limitation of the study	117
CHAPTER 6: SUMMARY	119
BIBLIOGRAPHY	125
APPENDIX	

LIST OF TABLES

		page
1	Malnutrition Among Children by Age and Sectors: 1980/82 and 1975/76	11
2	Caloric Deficit by Income Group in Sri Lanka, 1980/81	14
3	Apparent Per Capita Daily Caloric Consumption by Income Quintiles, 1978/79 and 1981/82: All Island and Sectors	16
4	Estimation of Caloric Deficits by Income Group in Sri Lanka	17
5	Average Household Size and Income by Districts	75
6	Food Consumption Pattern with Household Income	77
7	Per Capita Food Consumption by Sectors	81
8	Food Consumption Pattern with Household Income: Food-Stamp Receipts	85
9	Food Consumption Pattern with Household Income: Food-Stamp Non-Receipts	86
10	Per Capita Daily Intake of Energy, Total Protein, Calcium, Iron, Thiamin, Riboflavin, and Niacin	89
11	Per Capita Daily Intake of Energy, Total Protein, Calcium, Iron, Thiamin, Riboflavin, and Niacin: Food-Stamp Receipts	90
12	Per Capita Daily Intake of Energy, Total Protein, Calcium, Iron, Thiamin, Riboflavin, and Niacin: Food-Stamp Non-Receipts	91
13	Coefficients of the Unrestricted Rotterdam Model for Starch Food	96
14	Compensated Partial Price and Partial Expenditure Elasticities of the Restricted Rotterdam Model for Starch Food	97
15	Uncompensated Partial Price and Partial Expenditure Elasticities of the Unrestricted Rotterdam Model for Starch Food	99

16	Coefficients of the Restricted Rotterdam Model for Starch Food	101
17	Compensated Partial Price and Partial Expenditure Elasticities of the Restricted Rotterdam Model for Starch Food	102
18	Uncompensated Partial Price and Partial Expenditure Elasticities of the Restricted Rotterdam Model for Starch Food	104
19	Coefficients of the Unrestricted Rotterdam Model for Proteneous Food	106
20	Compensated Partial Price and Partial Expenditure Elasticities of the Unrestricted Rotterdam Model for Proteneous Food	107
21	Coefficients of the Restricted Rotterdam Model for Proteneous Food	109
22	Compensated Partial Price and Partial Expenditure Elasticities of the Restricted Rotterdam Model for Proteneous Food	110
23	Uncompensated Partial Price and Partial Expenditure Elasticities of the Restricted Rotterdam Model for Proteneous Food	113
