Department of Nursing

4th End Semester Examination – 2020 –2016/2017 Batch (10th)

NSE 2226- Statistics and Epidemiology in Nursing - SEQ

Date: 25th November 2020

Time: 10.00 a.m.-12 noon

Duration: 2 hours

Index Number:

Answer all the questions

1. Nursing undergraduate has designed a study to assess no of times a child (aged 2-5) would sleep per day at home. This study was conducted among 25 kids and mothers were asked to note down number of times her kid slept in a given day and had collected following data.

5	6	6	8	5	6	7	5	6
4	9	5	5	8	9	5	8	5
9	6	7	4	5	4	4		

1.1 What is the mean sleeping time among these kids? (05 marks)

.....
.....

1.2 What are the median sleeping times among these kids? (03 marks)

.....
.....

1.3 What is the most frequent sleeping time among the study subjects? (02 marks)

.....
.....

1.4 Tabulate frequency distribution of this study sample in the space below. (20 marks)

1.7.1 Which band does Kasun's score fit in? (05 marks)

.....

1.7.2 What percentage of students is above his marks? (05 marks)

.....

1.7.3 What percentage of students is below his performance? (05marks)

.....

1.7.4 If the pass mark is 60, what is the percentage of students who will get through the examination? (05 marks)

.....

1.7.5 Give reasons for Kasun's mother comment 'exceptionally intelligent' (10 marks)

.....

.....

.....

1.7.6 A friend of Kasun's Mother also had her child tested and discovered that her daughter had an IQ of 2 standard deviations above the average IQ. What is her child's IQ? (10 marks)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

2.4 There were 50 males and 75 females in the 10th batch of Nursing degree program. At the end of first semester males got on average 50 marks for Basic Sciences module whereas females got 55 marks. The standard deviation was 5 and 10 respectively. You were asked to assess any difference in marks among these 2 groups.

2.4.1 What is the statistical test you will apply to assess this difference. (05 marks)

.....

.....

2.4.2 What is your null hypothesis? (05 marks)

.....

.....

2.4.3 Formulate an alternate hypothesis for this assessment. (05 marks)

.....
.....

2.4.4 Test the hypothesis that was formulated in the question 2.4.2. (25 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

2.2 There were 50 males and 12 females in the 10th batch of Nursing degree program. At the end of first semester males got an average 50 marks for Basic Science module whereas females got 53 marks. The standard deviation was 5 and 10 respectively. You were asked to assess any difference in marks among these 2 groups.

2.4.1 What is the statistical test you will apply to assess this difference? (05 marks)

.....
.....

2.4.2 What is your null hypothesis? (05 marks)

.....
.....

Use following formula or data for your calculations in 2.4.4

$$t = \frac{\bar{X}_T - \bar{X}_C}{\sqrt{\frac{\text{var}_T}{n_T} + \frac{\text{var}_C}{n_C}}}$$

Square root values

0.10 = 0.316
 0.13 = 0.360
 0.23 = 0.480

t Table

Answer all the questions

4

4.1 Outline the importance of studying “causality” for health care. (15 marks)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

4.2 Define the term “confounding factor” with an example. (20 marks)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

4.3 Define the terms given below, in relation to causality.

4.3.1. Consistency

(05 marks)

.....

.....

.....

.....

.....

4.3.2. Dose-Response Relationship

(05 marks)

.....

.....

.....

.....

.....

4.3.3. Experimental evidence

(05 marks)

.....

.....

.....

.....

.....

4.4 List types of descriptive study designs used in epidemiological studies.

(10 marks)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

4.5 List two (02) advantages and disadvantages of following study designs.

(10 marks)

4.5.1 Case control studies

.....

.....

.....

.....

.....

.....

.....
.....
.....

4.5.2 Cohort studies (10 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....

4.5.3 Descriptive cross sectional studies (10 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

4.5.4 Quasi experimental studies (10 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....
